DIN EN 12007-3:2015-07 (E)

Gas infrastructure - Pipelines for maximum operating pressure up to and including 16 bar - Part 3: Specific f untional requirements for steel

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 7

4 Design 7
4.1 General requirements for selection of steel materials 7
4.1.1 General 7
4.1.2 Quality level 8
4.1.3 Weldability 8
4.1.4 Impact energy 9
4.1.5 Inspection documents for components 9
4.2 Pipes and fittings 9
4.2.1 Steel pipes 9
4.2.2 Fittings 10
4.3 Insulating joints 10
4.3.1 Type test 10
4.3.2 Strength test 10
4.3.3 Tightness test 11
4.3.4 Electrical test 11
4.3.5 Inspection documents 11
4.4 Valves 11
4.5 Corrosion protection 11
4.5.1 General 11
4.5.2 Passive corrosion protection 11
4.5.3 Active corrosion protection 12
4.6 Jointing methods 12
4.6.1 Welding joints 12
4.6.2 Flanged joints 12
4.6.3 Threaded joints 12
4.6.4 Compression joints 12

5 Construction 13
5.1 Handling, transportation and storage 13
5.2 Laying 13
5.2.1 General 13
5.2.2 Pipe stringing 13
5.2.3 Deflection 13
5.2.4 Connections to other plant 14
5.2.5 Valves 14
5.2.6 Boring, jacking and impact moling 14
5.3 Construction records 14

6 Coating inspection 15

7 Pressure testing 15

Annex A (informative) Handling, transportation and storage 16

A.1 Safety 16
A.2 Handling 16
A.3 Transportation 17
A.4 Storage 17

Annex B (informative) Deflection of pipes 19

Annex C (informative) Calculation of wall thickness 20

Annex D (informative) Significant technical changes between this European Standard and the previous edition 21
