

# DIN EN 16723-2:2017-10 (E)

## Natural gas and biomethane for use in transport and biomethane for injection in the natural gas network - Part 2: Automotive fuels specification

---

| Contents  | Page |
|---|------|
| European foreword .....   | 3    |
| Introduction .....  | 4    |
| 1 Scope .....   | 6    |
| 2 Normative references .....  | 6    |
| 3 Terms and definitions .....   | 6    |
| 4 Parameters and test methods .....   | 8    |
| 4.1 General .....   | 8    |
| 4.2 Standard reference conditions .....   | 8    |
| 4.3 Requirements, limit values and related test methods for natural gas and biomethane as automotive fuels .....                              | 9    |
| 4.4 Requirement on climate-dependant characteristic and test methods for natural gas and biomethane as automotive fuels .....                 | 10   |
| 5 Sampling .....  | 10   |
| 6 Marking, labelling and packaging .....  | 10   |
| Annex A (informative) Parameters .....  | 11   |
| A.1 Total silicon .....   | 11   |
| A.2 Hydrogen .....  | 11   |
| A.3 Compressor oil, dust impurities and biogenic materials .....  | 12   |
| A.4 Water dew point .....   | 12   |
| A.5 Hydrocarbon dew point temperature .....   | 13   |
| A.6 Hydrogen sulfide plus Carbonyl sulfide .....  | 13   |
| Annex B (informative) Odorization and sulfur .....  | 14   |
| B.1 CEN/TC 408 approach .....   | 14   |
| B.2 General .....   | 14   |
| B.3 Total sulfur from Odorants .....  | 14   |
| Annex C (informative) Properties of gases at the extremities of the Wobbe index ranges of the gas groups for gases of the second family ..... | 15   |
| C.1 Introduction .....  | 15   |
| C.2 Basis of calculations of indicative ranges .....  | 16   |
| C.3 Calculated properties .....   | 17   |
| C.4 Conclusions .....   | 17   |
| Annex D (informative) Voluntary dedicated grades .....  | 20   |
| Bibliography .....  | 22   |
