

DIN EN ISO 16924:2018-11 (E)

Natural gas fuelling stations - LNG stations for fuelling vehicles (ISO 16924:2016)

Contents		Page
European foreword		6
Foreword		8
1	Scope	9
2	Normative references	9
3	Terms and definitions	10
4	Abbreviated terms	17
5	Risk management	18
5.1	Risk assessment	18
5.1.1	General	18
5.1.2	Protection against overpressure	18
5.1.3	Static electricity	19
5.2	Fire protection	19
5.2.1	Hazardous area classification	19
5.2.2	Sources of ignition	19
5.2.3	Fire fighting	20
5.3	Explosion protection measures	20
6	General design requirements	20
6.1	General	20
6.1.1	Design philosophy	20
6.1.2	Buildings and civil works	21
6.1.3	Installation and construction	22
6.2	Site layout	23
6.2.1	Separation distances	23
6.2.2	Traffic management	23
6.2.3	Security	23
6.2.4	Requirements for location of equipment	23
6.3	Environmental considerations	24
6.3.1	Noise attenuation	24
6.3.2	Prevention of venting of natural gas	24
7	Fuel supply to the fuelling station	24
7.1	Application	24
7.2	Equipment compatibility	24
7.3	Filling connector	25
7.4	Requirements for filling	25
7.4.1	General requirements	25
7.4.2	Prevention of overpressurization and overfilling	25
7.5	Prevention of back flow	25
7.6	Bleed connections	25
7.7	Draining of liquid from the LNG storage tank	26
7.8	LNG tanker	26
7.8.1	Immobility	26
7.8.2	Anti-drive-away equipment	26
7.8.3	Turning off the engine	26
7.8.4	Equalizing the potentials	26
8	Storage	26
8.1	LNG storage	26
8.1.1	Design and construction	26
8.1.2	Safety requirements	28
8.1.3	Installation guidance	32
8.2	CNG buffer storage	33

9	Pumps and compressors	33
9.1	Connection of LNG pumps to the LNG storage tank	33
9.1.1	General	33
9.1.2	NPSH requirements	33
9.1.3	Vapour return	33
9.1.4	Protection against weather	33
9.1.5	Accessibility	34
9.2	LNG centrifugal pump (including ancillaries)	34
9.2.1	General provisions	34
9.2.2	Liquid inlet to the centrifugal pump	34
9.2.3	Centrifugal pump design	34
9.2.4	Vibration	34
9.2.5	Detection of shaft seal leak	35
9.2.6	Detection of cavitation	35
9.3	LNG reciprocating pump for LCNG fuelling stations (including ancillaries)	35
9.3.1	General provisions	35
9.3.2	Liquid supplied to the reciprocating pump	35
9.3.3	Design	35
9.3.4	Vibration	35
9.3.5	Pulsation	35
9.4	Commonalities for LNG centrifugal and reciprocating pumps	35
9.4.1	Suction line	35
9.4.2	Instrumentation	36
9.4.3	Markings of a pump	36
9.4.4	Instructions	36
9.5	Natural gas compressor	37
10	Dispensers	37
10.1	LNG dispensers	37
10.1.1	General requirements	37
10.1.2	Breakaway system	39
10.1.3	Fuelling hoses	39
10.1.4	Fuelling nozzles	40
10.1.5	Dispenser enclosure	40
10.1.6	Other requirements	41
10.2	CNG dispensers	41
11	Vaporizers and heaters	42
11.1	Application	42
11.2	Design of vaporizers and heaters	42
11.3	Ambient air vaporizer	43
11.3.1	General	43
11.3.2	Defrosting	43
11.3.3	Aluminium vaporizers	43
11.4	Electric vaporizer/heater	43
11.5	Water bath vaporizer	44
11.6	Fired vaporizers	44
11.7	Remotely heated vaporizers	44
12	Odorization	44
12.1	General requirements	44
12.2	High-pressure odorizer	45
12.3	Safety	45
12.4	Monitoring	45
12.5	Odorant	46
12.6	Dynamics of function	46
13	Pipework	46
13.1	General	46

13.2	Pipework design.....	46
13.2.1	General.....	46
13.2.2	Overground pipework.....	47
13.2.3	Underground pipework.....	47
13.2.4	Pipework in ducts.....	47
13.2.5	Flexible connections.....	48
14	Electrical equipment and wiring.....	48
14.1	General.....	48
14.2	Main considerations.....	48
14.2.1	Grounding.....	48
14.2.2	Lightning.....	48
14.2.3	Contact with live parts.....	48
14.2.4	Cables.....	48
14.2.5	Static electricity.....	49
14.3	Other considerations.....	49
14.3.1	Interface.....	49
14.3.2	Primary seal.....	49
14.3.3	Additional seal.....	49
14.3.4	Conduit seals.....	49
14.3.5	Detection vents.....	50
15	Instrumentation and control system.....	50
15.1	General.....	50
15.2	Gas detectors.....	50
15.3	Flame detectors.....	50
15.4	Pressure gauges.....	50
15.5	Temperature sensors.....	50
15.6	Manual emergency shutdown devices.....	50
15.7	Emergency power supply unit.....	51
16	Emergency shutdown.....	51
16.1	Application.....	51
16.2	Procedure.....	51
16.3	Activation.....	51
16.4	ESD action.....	51
16.5	Reset.....	52
17	Special configurations.....	52
17.1	Movable LNG fuelling station.....	52
17.1.1	General requirements.....	52
17.1.2	Anchoring.....	52
17.1.3	Containment.....	52
17.2	Mobile LNG fuelling station.....	52
17.2.1	General requirements.....	52
17.2.2	Anchoring.....	53
17.2.3	Containment.....	53
17.2.4	Design.....	53
17.2.5	Additional requirements for operation.....	53
18	Testing and commissioning.....	53
18.1	Testing.....	53
18.1.1	Electrical testing.....	53
18.1.2	Pressure strength testing.....	54
18.1.3	Leak testing.....	54
18.2	Commissioning.....	54
18.2.1	General provisions.....	54
18.2.2	Purging.....	55
18.2.3	Functional testing.....	55
18.2.4	First filling of the LNG storage tank and other components.....	55

19	Operations	55
19.1	LNG tanker offloading.....	55
19.2	Fuelling procedure.....	55
19.3	Safety signs.....	56
	19.3.1 General on identification labels.....	56
	19.3.2 Equipment marking.....	56
19.4	Equipment and pipework identification.....	57
19.5	Training.....	57
19.6	Installation and operating instructions.....	58
19.7	Emergency plan.....	59
19.8	Maintaining the emergency shutdown.....	59
20	Inspection and maintenance	59
20.1	Inspection.....	59
	20.1.1 General requirements.....	59
	20.1.2 Inspection and testing of electrical systems.....	60
	20.1.3 Inspection and re-testing of the safety relief valves.....	60
	20.1.4 Safety and fire protection equipment.....	61
20.2	Maintenance.....	61
	20.2.1 Preventive maintenance planning.....	61
	20.2.2 Maintenance procedures.....	61
	20.2.3 Maintenance safety.....	61
	20.2.4 Draining of the LNG storage tank.....	62
	Annex A (informative) Examples of hazardous zones classification	63
	Annex B (normative) Separation distances	67
	Annex C (informative) Example flow diagram of an LNG fuelling station	71
	Annex D (informative) Example flow diagram of an LCNG fuelling station	72
	Annex E (informative) Example flow diagram of an LNG and LCNG fuelling station	73
	Annex F (informative) Process requirements for the effective cryogenic pump operation	74
	Annex G (informative) Recommendations for installation of a centrifugal pump	75
	Annex H (informative) Recommendations for centrifugal pump design	76
	Annex I (informative) Recommendations for installation of a reciprocating pump	77
	Annex J (informative) Recommendations on the content of the cryogenic pump operation instructions	79
	Annex K (informative) Example flow diagram of a high-pressure odorizer	81
	Annex L (informative) LNG identification mark of an LNG fuelling station	82
	Bibliography	83
