ISO 22580:2020 (E)

Flares for combustion of biogas

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 Classifications of flares for combustion of biogas

6 Design and construction of flares for combustion of biogas

- 6.1 Efficiency of the flare
- 6.2 Pressure
- 6.3 Air supply and gas flow
- 6.4 Pilot burner
- 6.5 Treatment of the gas
- 6.6 Materials
- 6.7 Flame arresters
- 6.8 Burner control unit, ignition transformer, flame monitoring device
- 6.9 Safety valves and other valves
- 6.10 Control system
- 6.11 Flow measuring and gas analysis
- 6.12 Condensate removal
- 6.13 Insulation and heating
- 6.14 Heat protection
- 6.15 Buildings and cabinets
- 6.16 Lightning protection and earthing
- 6.17 Strength and stability calculations
- 6.18 Distances to other objects

7 Operations and maintenance requirements

- 7.1 Operations and maintenance manual
- 7.2 Testing of the flare
- 7.3 Operation of the flare
- 7.4 Maintenance and inspection of the flare
