

DIN EN ISO 20257-2:2021-12 (E)

Installation and equipment for liquefied natural gas - Design of floating LNG installations - Part 2: Specific FSRU issues (ISO 20257-2:2021)

Contents		Page
European foreword		5
Foreword		6
1	Scope	7
2	Normative references	7
3	Terms, definitions and abbreviated terms	8
3.1	Terms and definitions	8
3.2	Abbreviated terms	8
4	Basis of design	9
4.1	General description of FSRU	9
4.2	Main design criteria for process facilities	11
4.3	Reliability, availability and maintainability of LNG floating installation	12
4.4	Specific requirements for FSRU operating as LNG carrier	12
4.5	Specific FSRU studies	12
4.5.1	General	12
4.5.2	Environmental impact of seawater intake and discharge study	12
4.5.3	Recirculation study	13
4.5.4	Scour protection study	13
5	Specific health, safety and environmental issues	13
5.1	General	13
5.2	Environmental considerations related to water heating and cooling issues	13
5.3	Safety considerations	14
5.3.1	General requirements	14
5.3.2	Layout constrains	14
5.3.3	Layout constraints with respect to surroundings	15
5.3.4	Layout constraints with respect to facility arrangement	16
5.3.5	Risk prevention measures	17
6	Mooring and stationkeeping	22
7	Hull design	22
8	LNG storage	23
8.1	Specific requirements for cargo tank pressure management	23
8.2	Specific requirements for LNGC overpressure protection	23
8.3	Rollover risk	23
9	Transfer systems	23
9.1	General	23
9.2	Send-out natural gas: NG gas transfer requirements	23
9.2.1	Functional requirements	23
9.2.2	Transfer systems design	24
9.2.3	Emergency disconnection	25
9.2.4	Operating envelope	25
9.3	LNG sampling	26
10	BOG handling and recovery	27
10.1	General	27
10.2	LNG tank design pressure flexibility	27
10.3	Specific requirements for recondenser	27
10.4	Specific requirements for gas compressors	28

10.4.1	General.....	28
10.4.2	Specific functional requirements for LD compressors.....	28
10.4.3	Specific functional requirements for HD compressors.....	28
10.4.4	Specific functional requirements for HP or MSO compressors.....	28
11	Regasification equipment requirements.....	29
11.1	LNG pumps.....	29
11.1.1	General.....	29
11.1.2	Functional requirements.....	29
11.1.3	Materials selection.....	29
11.1.4	In-tank LNG pump.....	29
11.1.5	HP LNG pump.....	29
11.2	LNG vaporization system.....	30
11.2.1	Functional requirements.....	30
11.2.2	Vaporization type.....	30
11.2.3	Materials selection.....	31
11.2.4	Protective coating.....	31
11.2.5	Marine growth.....	31
11.2.6	Stability/vibration.....	31
11.2.7	Safety relief valves.....	32
11.3	Trim heater.....	32
11.4	Venting from regasification systems.....	32
12	Gas send out.....	32
12.1	High integrity pressure protection system.....	32
12.1.1	Send-out pressure control.....	32
12.1.2	Typical description of HIPPS.....	33
12.1.3	Design requirements for HIPPS.....	34
12.2	Send-out gas metering.....	35
12.2.1	Uses of send-out gas metering.....	35
12.2.2	Measurement devices type.....	35
12.2.3	Accuracy.....	35
12.2.4	External influences.....	35
12.2.5	Gas chromatograph – Gas analyser.....	36
12.2.6	Sparing philosophy.....	36
12.2.7	Z-configuration.....	36
12.3	Odorization systems.....	36
13	Utilities.....	36
13.1	General.....	36
13.2	Cooling and heating medium.....	36
13.2.1	Cooling medium.....	36
13.2.2	Heating medium.....	37
13.2.3	Nitrogen system.....	37
13.2.4	Fuel gas.....	37
14	Process and safety control systems.....	38
14.1	General requirements.....	38
14.2	Interfaces between FSRU and gas export connection.....	38
14.3	Communication onshore/offshore.....	38
15	Security management.....	38
16	Commissioning.....	38
17	Inspection and maintenance.....	39
17.1	General requirements.....	39
17.2	Cargo tank.....	39
17.3	In-tank LNG pump.....	39
17.4	Regasification equipment.....	39
17.4.1	HP LNG pump.....	39
17.4.2	LNG vaporizer.....	39
17.5	Recondenser.....	39
17.6	Handling/Crane equipment.....	39

18	Preservation and corrosion protection	40
19	Conversion of existing unit to floating LNG installations	40
	Annex A (informative) Regasification system description	41
	Bibliography	46
