DIN EN 1594:2024-05 (E)

Gas infrastructure - Pipelines for maximum operating pressure over 16 bar - Functional requirements

Contents

Page

European foreword 6

Introduction 8

1 Scope 9

2 Normative references 11

3 Terms and definitions 13

4 Quality and management systems 18

5 Safety and the environment 19
5.1 General 19
5.2 Appropriate safety measures 19
5.3 Routing considerations 20
5.3.1 General 20
5.3.2 Surveys 20
5.3.3 Environmental impact 20
5.3.4 Ground conditions 21
5.4 Line valve spacing 21

6 Pressure safety 21
6.1 Pressure levels 21
6.2 Normal operation 22
6.3 Requirements for installation of pressure safety devices 22
6.4 Pipeline with DP equal to or less than 40 bar and hoop stress 0,45 Rt0,5 23
6.5 Pipeline with DP equal to or less than 24 bar and hoop stress 0,30 Rt0,5 23

7 Design 23
7.1 General 23
7.1.1 Design principles 23
7.1.2 Basis of design 23
7.2 Wall thickness determination 24
7.2.1 Straight pipe 24
7.2.2 Bends and elbows 25
7.3 Additional design requirements 25
7.3.1 Forces 25
7.3.2 Soil engineering data required 26
7.3.3 Structural models for pipeline sections 26
7.4 Analysis of stress and strain 27
7.4.1 Elastic and extended elastic design 27
7.4.2 Limit state design 28
7.5 Design report 29
7.6 Land management and geotechnical studies 30
7.7 Depth of cover 30
7.8 Casing pipes 30
7.9 Station design 31
7.9.1 Layout 31
7.9.2 Components 32
7.9.3 Interaction with onshore pipeline section 32

7.9.4 Station pipework ... 33
7.10 Pipeline components ... 33
7.11 Pigging suitability ... 33
7.12 Arrangements for venting, recompression and flaring ... 33
7.13 Corrosion protection ... 34
7.13.1 General ... 34
7.13.2 External coating ... 34
7.13.3 Cathodic protection ... 35
7.14 Grid connections ... 35

8 Materials and components ... 36
8.1 General ... 36
8.1.1 Base material ... 36
8.1.2 Manufacturing requirements ... 36
8.1.3 Manufacturing procedure ... 36
8.1.4 Weldability ... 36
8.1.5 Mechanical properties ... 37
8.1.6 Inspection documents ... 38
8.1.7 Other steel types or grades ... 38
8.1.8 Records ... 38
8.2 Pipes ... 38
8.3 Fittings ... 39
8.3.1 General ... 39
8.3.2 Manufacturing ... 39
8.4 Flanged connections ... 39
8.5 Insulating connections ... 39
8.5.1 Type test ... 39
8.5.2 Strength test ... 39
8.5.3 Electrical test ... 40
8.5.4 External tightness test ... 40
8.6 Valves ... 40
8.7 External and internal coatings ... 40
8.8 Welding end preparation ... 40

9 Construction ... 40
9.1 General ... 40
9.2 Execution of work ... 40
9.2.1 General ... 40
9.2.2 Marking out the site ... 40
9.2.3 Initial site inspections ... 41
9.2.4 Working strip ... 41
9.2.5 Separation of topsoil ... 41
9.2.6 Trenches ... 41
9.2.7 Crossing and proximity of buried structures (cables and pipes) ... 42
9.2.8 Handling and stringing ... 42
9.2.9 Bends ... 43
9.2.10 Welding and weld examination ... 43
9.2.11 External coating ... 43
9.2.12 Lowering into the trench ... 46
9.2.13 Ballasting and anchoring ... 46
9.2.14 Tie-ins ... 46
9.2.15 Backfill ... 46
9.2.16 Reinstatement ... 47
9.2.17 Markings ... 47
9.2.18 Final site inspection with owners and users ... 47
9.3 Special crossings ... 47
9.3.1 General ... 47
9.3.2 Open-trench road or path crossings ... 47
9.3.3 Trenchless crossings ... 48
9.3.4 Requirements for casings ... 51
9.3.5 Open trench major water crossings ... 51
9.3.6 Horizontal directional drilling ... 51

9.4 Cleaning 52
9.5 Testing 52
9.5.1 General 52
9.5.2 Test preparation 53
9.5.3 Strength test 53
9.5.4 Tightness test 53
9.5.5 Pre-testing 54
9.5.6 Dewatering 54
9.5.7 Golden welds 54
9.6 Acceptance 54
9.6.1 As-built documents 54
9.6.2 Pre-commissioning 54
9.6.3 Handover and documentation 55

10 Operation and maintenance 55
10.1 General 55
10.1.1 Policy 55
10.1.2 Safety and environment 55
10.2 Organization 55
10.3 Operating and maintenance instructions 56
10.4 Emergency plan 57
10.5 Records and documentation 57
10.6 Commissioning 57
10.7 Decommissioning 58
10.8 Recommissioning 58
10.9 Maintenance, modification, and repair 58
10.9.1 General 58
10.9.2 Pipeline surveillance, inspection and monitoring 58
10.9.3 Execution of repairs and modifications 59
10.9.4 Work involving cutting of the pipeline 59
10.9.5 Work on in-service pipelines 59
10.9.6 Repairs after emergency 60
10.9.7 Other and special maintenance activities 60
10.10 Introduction of hydrogen in existing natural gas pipelines 61
10.11 Abandonment and removal 61

Annex A (normative) Requirements for fracture arrest of line pipe 62

A.1 General 62
A.2 CVN impact test 63
A.3 Drop weight tear test 65
A.4 Test pieces, method, and frequency for CVN and DWT tests 65

Annex B (informative) Hydrogen gas pipelines 66

B.1 General 66
B.2 New pipelines 66
B.3 Existing pipelines 66
B.4 Other considerations 67
