DIN EN 17921:2024-08 (E)

Natural gas fuelling stations - LNG unloading connector

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 8

4 Functional requirements 9
4.1 General requirement 9
4.2 Functional description of the LNG unloading connector 10
4.2.1 General 10
4.2.2 Dry connector 10
4.2.3 Protective cap 10
4.2.4 Type of mounting 10
4.2.5 Positive locking 10
4.2.6 Safe disconnect 10
4.2.7 (Internal) Check valve 10
4.2.8 Venting and depressurization 11
4.2.9 Electrical conductivity 11
4.2.10 Spillage volume 11

5 Technical description of LNG unloading connector 11
5.1 Materials 11
5.1.1 General 11
5.1.2 LNG unloading connector 11
5.1.3 Corrosion protection 11
5.2 Pressure rating 11
5.2.1 Maximum allowable working pressure (MAWP) 11
5.2.2 Maximum working pressure 11
5.2.3 Design cycle life; 11
5.3 LNG unloading connector mounting 12
5.4 LNG unloading connector working temperature range 12
5.4.1 General 12
5.4.2 Material of the bodies of the LNG unloading receptacle and of the LNG unloading nozzle 12

6 Design of the LNG unloading connector 13

7 Tests requirements 14
7.1 General requirements 14
7.1.1 General 14
7.1.2 Ambient test conditions 14
7.1.3 Cryogenic test conditions 15
7.2 Shell tightness at ambient temperature 15
7.3 Shell strength at ambient temperature 15
7.4 Seat tightness at ambient temperature 15
7.5 Obturator strength at ambient temperature against atmosphere 15
7.6 Shell tightness at minimum working temperature 16
7.7 Seat tightness at minimum working temperature 16
7.7.1 General 16

7.7.2 Test arrangement for LNG unloading nozzle (Figure 3) 16
7.7.3 Test arrangement for LNG unloading receptacle (Figure 4) 17
7.8 Burst test 17
7.9 Operation test at minimum working temperature 17
7.10 Endurance test 18
7.11 Bending test 18
7.12 Drop test 18
7.13 Tensile force 19
7.13.1 Manual force in warm conditions 19
7.13.2 Manual force at cold conditions under frost 19
7.14 Corrosion resistance 19

8 Safety requirements 20

9 Maintenance 20
