DIN EN 17928-1:2025-02 (E)

Gas infrastructure - Injection stations - Part 1: General requirements

Contents

Page

European foreword 5

1 Scope 6

2 Normative references 8

3 Terms and definitions 10

4 General requirements 14
4.1 General 14
4.2 Quality and management system 14
4.3 Environmental constraints 15
4.3.1 General requirements 15
4.3.2 Adaptation to the effects of climate change 15
4.3.3 Mitigation of the impact of earthquakes 16
4.3.4 Greenhouse gas emissions 16
4.4 Coordination requirements and definition of interfaces 18
4.5 On-site station diagram 18
4.6 Explosion protection 18

5 Operational functions 19
5.1 Nominal service conditions of injection stations 19
5.2 Backflow and refeeding to upgrading and/or production 20
5.2.1 General requirements 20
5.2.2 Backflow from an injection station 20
5.2.3 Process-related controlled refeeding 20

6 Overall safety requirements and protection against inadmissible operating modes 20
6.1 General requirements 20
6.2 Emergency energy supply 21
6.3 Approach to protection against inadmissible operating modes 21
6.4 Safety-related systems 22
6.4.1 General requirements 22
6.4.2 SIS safety-related systems 22
6.4.3 Mechanical/pneumatic safety-related systems 23
6.5 Injection station emergency shut-off 23
6.6 Protections against inadmissible operation modes by safety-related systems 23
6.6.1 Protection against inadmissible overpressure 23
6.6.2 Protection against inadmissible under-pressure 24
6.6.3 Protection against inadmissible gas temperatures 24
6.6.4 Protection against potentially explosive atmospheres 24
6.6.5 Protection against overflow and underflow 24
6.6.6 Protection against inadmissible composition of the injection of gas 24
6.6.7 Protection against use/ageing/corrosion 25
6.7 Information security 25

7 Specific requirements for systems and components 25
7.1 Common requirements 25
7.2 Systems 25
7.2.1 Compression system 25
7.2.2 Pressure control systems 26
7.2.3 Gas analysis system 26

7.2.4 Gas measuring systems 28
7.2.5 Gas-Gas mixing system 28
7.2.6 Odorization systems 30
7.2.7 Deodorisation systems 30
7.3 Components 30
7.3.1 Mechanical safety devices for protection against inadmissible over- and underpressure . 30
7.3.2 Isolation valves 30
7.3.3 Pipework 30
7.3.4 Pressure vessels 31
7.3.5 Function test equipment 31

8 Building and layout requirement 32
8.1 General 32
8.1.1 Transport and escape routes 32
8.1.2 Noise control 32
8.1.3 Isolation of gas flow outside of the place of installation 32
8.1.4 Working areas 33
8.1.5 Protection against harmful external influences 33
8.1.6 Safety marking 33
8.2 Indoor Housing 33
8.2.1 General 33
8.2.2 Installation in residential or commercial buildings 33
8.2.3 Openings 33
8.2.4 Ventilation 33
8.2.5 Walls, ceilings, roofs, and ducts 34
8.3 Outdoor Installation 34
8.3.1 Outdoor station design 34

9 Electrical requirements 34
9.1 Electrical equipment 34
9.2 Electrical resistance of floor coverings 34
9.3 Cable ducts 35
9.4 Isolating joints 35
9.5 Lightning protection and equipotential bonding 35
9.5.1 Protective equipotential bonding 35
9.5.2 External and internal lightning protection, lightning protective equipotential bonding 35

10 Testing 35
10.1 General requirements 35
10.2 Tests carried out by the manufacturer 36
10.3 Tests at the place of installation 36
10.3.1 General requirements 36
10.3.2 Compliance with safety-related approval and structural requirements 36
10.3.3 Connections to the station 36
10.3.4 Welds and Joints control 36
10.3.5 Tightness 37
10.3.6 Function and Setpoint 37
10.3.7 Explosion protection 37
10.4 Testing of electrical systems and equipment 37
10.5 Proof of testing 37
10.5.1 Testing by the manufacturer 37
10.5.2 Testing at the place of installation 38
10.5.3 Explosion protection testing 38
10.5.4 Testing of electrical systems and equipment 38
10.5.5 Testing documentation 38

11 Commissioning 38

12 Operation and maintenance 39
12.1 General 39
12.2 Data 39
12.3 Maintenance, modifications and repair 39

12.4 Training 40
12.5 Work undertaken 40
12.6 Fire fighting 41

13 Decommissioning and disposal 41
13.1 Decommissioning 41
13.2 Disposal 41

Annex A (informative) Coordination between operators 42

Annex B (informative) Compression system specification data sheet 44

Annex C (informative) Test schedule 46

Annex D (normative) Test ratings in accordance with Clause 11 50

Annex E (informative) Refeeding station 51

Annex F (normative) Mitigation of the impact of earthquakes 52

Annex G (informative) Typical Gas Mixing Plants -- Examples 53

Annex H (informative) Categories of methane emissions in the scope of this document 57
