DIN EN 303-7:2007-05 (E)

Heating boilers - Part 7: Gas-fired central heating boilers equipped with a forced draught burner of nominal heat out put not exceeding 1 000 kW

Contents

Page

Foreword ... 3

1 Scope ... 4

2 Normative references ... 4

3 Terms and definitions ... 5

4 Constructional and operational requirements ... 9
4.1 General principles ... 9
4.2 Operational requirements ... 9

5 Test methods ... 18
5.1 General principles ... 18
5.2 External tightness of the gas line ... 21
5.3 Heat input rates ... 21
5.4 Gas pressure governor ... 22
5.5 Safety of operation ... 22
5.6 Control and safety equipments ... 25
5.7 Combustion ... 26
5.8 Useful efficiencies ... 27
5.9 Condensation ... 34

6 Marking and instructions ... 34
6.1 Marking ... 34
6.2 Instructions ... 36
6.3 Presentation ... 38

Annex A (informative) Diameters of combustion products evacuation ducts marketed in the various countries ... 49

Annex B (informative) Practical method of calibrating the test rig to enable determination of heat loss Dp ... 50

Annex C (informative) Determination of the heat losses from the test rig of the indirect method and the contributions of the circulating pump of the test rig (see 5.8.2.3.1.3) ... 51

Annex D (informative) Determination of the operating time at full rate prior to modulation ... 52

Annex E (normative) Determination of the combustion characteristics - Carbon monoxide and nitrogen oxides ... 53

Annex F (normative) Case of a forced draught burner complying with EN 676 ... 55

Annex G (informative) Main symbols and abbreviations used ... 56

Annex H (informative) A-deviations ... 57

Annex ZA (informative) Clauses of this European Standard addressing essential requirements or other provisions of EU Directives ... 58

Bibliography ... 61
