DIN EN 12186:2006-01 (E)

Gas supply systems - Gas pressure regulating stations for transmission and distribution - Functional requirements

Contents

Page

1 Scope 5

2 Normative references 5

3 Definitions, symbols and abbreviations 6
3.1 General 6
3.2 Station 7
3.3 Pressure, design and testing 7
3.4 Pressure control 8

4 Quality system 9

5 Layout of the gas pressure regulating station 9
5.1 General 9
5.2 Layout of the site 9
5.3 Site security 9

6 Housings 10
6.1 General 10
6.2 Requirements for housings 10
6.3 Underground stations 11

7 Design of the station 12
7.1 General 12
7.2 Gas pre-heating 12
7.3 Filters, separators, scrubbers 12
7.4 Noise control 13
7.5 Apertures and vent lines 13
7.6 Electrical installation 14
7.7 Lightning and earthing 14
7.8 Cathodic protection and electrical isolation 14
7.9 Ancillaries 14
7.10 Pipework 14
7.11 Welding 15
7.12 Instrumentation pipework 15
7.13 Stress analysis 16
7.14 Isolating valves 17

8 Pressure control 17
8.1 General 17
8.2 Pressure regulating system 17
8.3 Pressure safety system 18
8.4 Non-venting pressure safety devices 19
8.5 Venting pressure safety devices 19
8.6 Pressure warning system 19
8.7 Instrumentation 19
8.8 Bypasses 20

9 Testing 20
9.1 General 20
9.2 Strength test 20

9.3 Tightness test 20
9.4 Reporting 21

10 Commissioning 21

11 Operation and maintenance 22
11.1 General 22
11.2 Data 22
11.3 Maintenance 22
11.4 Training 23
11.5 Work undertaken 23
11.6 Firefighting 23

Annex A (informative) Bibliography 24
