DIN EN 416-2:2006-10 (E)

Single-burner gas-fired overhead radiant tube heaters for non-domestic use - Part 2: Rational use of energy

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Classification of appliances 7
4.1 Classification according to the nature of the gases used 7
4.2 Classification according to the gases capable of being used 7
4.3 Classification according to the mode of evacuation of the combustion products 7

5 Symbols 7

6 Requirements for the rational use of energy 8

7 Test methods 9
7.1 General 9
7.2 Radiant factor 9
7.2.1 General 9
7.2.2 Method A 9
7.2.3 Method B 18

Annex A (informative) Recording test data (Test method A) 21

A.1 General information to be recorded 21
A.2 Measurement results 21

Annex B (informative) Blank forms (Test method A) 22

B.1 Model test result form - Quarter sphere burner end and opposite end 22
B.2 Model test result form - Quarter cylinder (Burner side and opposite side) 23
B.3 Model test result form - Half sphere for appliances less than or equal to 1,3 m long 24

Annex C (informative) Worked example (Test method A) 25

C.1 Radiant factor - Recorded data and calculation 25
C.2 Radiant output - Recorded data and calculation 26
C.2.1 Quarter spheres (Burner end and opposite end) 26
C.2.2 Quarter cylinders (Burner side and opposite side) 27

Annex D (normative) Procedure for measuring the window correction factor (Fw) (Test method A) 28

Annex E (normative) Correction of measured radiant output for absorption by air (Test methods A and B) 29

E.1 General 29
E.2 Mean beam length (D) 29
E.3 Absorption of radiation by water vapour 29
E.4 Absorption of radiation by carbon dioxide 30

E.5 Total radiation absorption 31
E.6 Calculation method 31

Annex F (informative) Radiant heat output data - Recording of results (Test method B) 32

F.1 General information to be recorded 32
F.1.1 Test and appliance data 32
F.1.2 Radiometer technical data 32
F.1.3 Measuring plane technical data 32
F.2 Measurement results 33
F.2.1 Test information 33
F.2.2 Test ambient conditions 33
F.2.3 Gas/heat input data 33
F.2.4 Flue gas data 33
F.2.5 Absorption of water vapour and CO2 data 34
F.2.6 Irradiation measurement data 34

Annex G (informative) Worked example (Test method B) 35

G.1 General information 35
G.2 Radiometer technical data 35
G.3 Measuring plane technical data 35
G.4 Measurement results 36
G.4.1 Test information 36
G.4.2 Test ambient conditions 36
G.4.3 Gas/heat input data 36
G.4.4 Flue gas data 36
G.4.5 Absorption of water vapour and CO2 data 37
G.4.6 Irradiation measurement data 37

Annex H (informative) Radiometer design (Test method B) 40

H.1 Principle radiometer design features 40
H.2 Radiometer technical design 41
H.3 Pyro-electric detector 41

Annex I (normative) Radiometer calibration (Test method B) 42

I.1 Radiometer calibration 42
I.1.1 General 42
I.1.2 Black Body calibration method 42
I.2 Worked example 43

Annex ZA (informative) Clauses of this European Standard addressing essential requirements or other provisions of EU directives 45
