DIN EN 13718-1:2008-11 (E)

Medical vehicles and their equipment - Air ambulances - Part 1: Requirement s for medical devices used in air ambulances

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Requirements for medical devices for air ambulances 8
4.1 Patient and personnel safety 8
4.2 User interface 8
4.3 Environmental conditions and performance of medical devices intended for use in air ambulances) 8
4.3.1 Functional temperature range 8
4.3.2 Humidity 9
4.3.3 Variable atmospheric pressures 9
4.4 Electrical power driven medical devices 9
4.4.1 General 9
4.4.2 Medical devices with 12 V DC power input 9
4.4.3 Medical devices with 24 V DC power input 9
4.4.4 Internal electrical power source 10
4.4.5 Inverters 10
4.4.6 Electromagnetic interference of medical devices 10
4.5 Gas supply 10
4.5.1 General 10
4.5.2 Gas leakage 10
4.5.3 Pressure regulators and flow metering devices 10
4.5.4 Pneumatic power supply 10
4.5.5 Cylinder valves 11
4.5.6 Low pressure hose assemblies 11
4.6 Mechanical strength 11
4.6.1 General 11
4.6.2 Vibration and bump 11
4.6.3 Free fall 11
4.7 Fixation of medical devices in air ambulances 11
4.8 Fire resistance 11
4.9 Information to be supplied by the manufacturer 12

5 Test methods 12
5.1 General 12
5.2 Ambient conditions 12
5.3 Test method for durability of markings and colour coding 12
5.4 Free fall 12

Annex A (informative) Comparative military standards 13

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC Medical Devices 16
