1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 General 6
4.1 Essential requirements 6
4.2 Identification of kit components 6

5 Content of the outer container label 6
5.1 Manufacturer 6
5.2 Identification of the IVD reagent 6
5.3 Contents 6
5.4 Intended use 6
5.5 In vitro diagnostic use 7
5.6 Storage and handling conditions 7
5.7 Expiry date 7
5.8 Warnings and precautions 7

6 Content of the immediate container label 7
6.1 General provisions 7
6.2 Manufacturer 8
6.3 Identification of the IVD reagent 8
6.4 Contents 8
6.5 In vitro diagnostic use 8
6.6 Storage and handling conditions 8
6.7 Expiry date 8
6.8 Warnings and precautions 8

7 Content of the instructions for use 9
7.1 Manufacturer 9
7.2 Identification of the IVD reagent 9
7.3 Intended use 9
7.4 Principles of the examination method 9
7.5 Traceability of values assigned to calibrators and trueness-control materials 9
7.6 Components 10
7.7 Additional required equipment 10
7.8 Reagent preparation 10
7.9 Storage and shelf life after first opening 10
7.10 Warnings and precautions 10
7.11 Primary sample collection, handling and storage 11
7.12 Examination procedure 11
7.13 Control procedure 11
7.14 Calculation of examination results 11
7.15 Interpretation of results 11
7.16 Performance characteristics 11
7.17 Biological reference intervals 12
7.18 Limitations of the examination procedure 12

7.19 Literature references 12

Bibliography 13

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of the EU Directive 98/79/EC on "in vitro Diagnostic Medical Devices" 15
