Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 General requirements 3

5 *Requirements 4
5.1 Supralaryngeal airways 4
5.1.1 *Size designation 4
5.1.2 Materials 4
5.1.3 *Ventilatory opening 4
5.1.4 *Safeguards against collapse of the ventilatory pathway 5
5.1.5 *Sealing mechanism 5
5.1.6 *Internal volume 5
5.1.7 Maximum instrument size 5
5.2 Supralaryngeal airway connectors 6

6 Requirements for supralaryngeal airways and connectors supplied sterile 6
6.1 Sterility assurance 6
6.2 Packaging for supralaryngeal airways and connectors supplied sterile 6

7 Cleaning and disinfection or sterilization 6

8 Markings 6
8.1 Use of symbols 6
8.2 Marking of the supralaryngeal airway 6
8.3 Marking on the supralaryngeal airway individual pack 7

9 Accompanying documents 7

Annex A (informative) Rationale 10

Annex B (normative) Evaluation and documentation of the clinical performance in human subjects 15

Annex C (normative) Test methods to determine kink resistance 17

Annex D (informative) Hazard identification for risk assessment 22

Annex E (informative) Guidance on materials and design 26
