DIN EN ISO 26782:2010-02 (E)

Anaesthetic and respiratory equipment - Spirometers intended for the measurement of time forced expired volumes in humans (ISO 26782:2009 + Cor. 1:2009) (includes Corrigendum AC:2009)

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 General requirements 8
4.1 Electrical safety 8
4.2 Mechanical safety 8

5 Identification, marking and documents 8
5.1 Marking of the scale or display 8
5.2 Legibility of markings 9
5.3 Durability of markings 9
5.4 Marking of the spirometer or its packaging 10
5.5 Instructions for use 10
5.6 Technical description 12

6 Measurement range 12

7 Performance requirements 12
7.1 Accuracy 12
7.2 Recording time 13
7.3 Graphical display aspect ratios 13
7.4 Volume recording 13
7.5 Start of forced exhalation 13
7.6 End of forced exhalation 13
7.7 Linearity 13
7.8 Repeatability 13
7.9 Expiratory impedance 14

8 Constructional requirements 14
8.1 Effects of dropping components of a hand-held spirometer or accessory 14
8.2 Calibration 14
8.3 Dismantling and re-assembly 14

9 Cleaning, sterilization and disinfection 14
9.1 Re-usable spirometer and parts 14
9.2 Spirometer and parts requiring processing before use 15
9.3 Spirometer and parts delivered sterile 15

10 Biocompatibility 15

Annex A (informative) Rationale 16

Annex B (normative) Testing accuracy, linearity and impedance of spirometers 20

Annex C (normative) Defined test profiles 24

Annex D (informative) Environmental aspects 27

Annex E (informative) Reference to the essential principals 28

Bibliography 30

Alphabetized index of defined terms used in this International Standard 31

Annex ZA (informative) Relationship between this standard and the Essential Requirements of EU Directive 93/42/EEC 32
