

DIN EN ISO 8835-3:2011-02 (E)

Inhalational anaesthesia systems - Part 3: Transfer and receiving systems of active anaesthetic gas scavenging systems; (ISO 8835-3:2007 + Amd. 1:2010) (includes Amendment A1:2010)

Contents	Page
Introduction	5
* 1 Scope	6
2 Normative references	6
3 Terms and definitions	7
4 General requirements and alternative test methods	9
4.1 Materials	9
4.2 Means of pressure relief	9
4.3 Alternative test methods	9
* 5 Patient and environmental protection	9
5.1 Normal operating conditions	9
5.2 Single fault conditions	10
* 6 Connectors	10
* 7 Transfer systems	10
7.1 Inlet of transfer systems	10
7.2 Outlet of transfer systems	11
* 8 Receiving systems	11
8.1 General	11
8.2 Inlet of receiving systems	11
8.3 Outlet of receiving systems	12
8.4 Visual indicator	12
8.5 Particle filter	12
8.6 Receiving hoses	12
9 Extract flow resistance	12
9.1 Low-flow transfer and receiving systems	12
9.2 High-flow transfer and receiving systems	12
10 Electrical requirements	13
* 11 Information to be supplied by the manufacturer	13
12 Marking	13
* 13 Colour coding	13
Annex A (informative) Typical test arrangement and method for pressure measurement at inlet to AGSS	14

Annex B (informative) Typical test arrangement and method for sub-atmospheric pressure limitation	18
Annex C (informative) Typical test arrangement and method for testing of induced flow	19
Annex D (informative) Typical test arrangement and method for resistance to extract flow	20
Annex E (informative) Typical test arrangement and method for spillage	22
Annex F (informative) Rationale	25
Annex G (informative) Environmental aspects	27
Bibliography	28
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC	29
