| Foreword .....     |                                  | 3           |
| Introduction ..... |                                  | 4           |
| 1                  | Scope .....                      | 5           |
| 2                  | Normative references .....       | 5           |
| 3                  | Dimensions and designation ..... | 5           |
| 3.1                | Dimensions .....                 | 5           |
| 3.2                | Designation .....                | 6           |
| 4                  | Material .....                   | 6           |
| 5                  | Requirements .....               | 6           |
| 5.1                | Hydrolytic resistance .....      | 6           |
| 5.2                | Annealing quality .....          | 6           |
| 5.3                | Breaking force .....             | 6           |
| 6                  | Test for breaking force .....    | 10          |
| 6.1                | Principle .....                  | 10          |
| 6.2                | Tensile testing machine .....    | 10          |
| 6.3                | Sampling .....                   | 10          |
| 6.3.1              | Number of samples .....          | 10          |
| 6.3.2              | Conditioning of samples .....    | 10          |
| 6.4                | Procedure .....                  | 10          |
| 6.5                | Expression of results .....      | 11          |
| 6.6                | Test report .....                | 11          |
| 7                  | Delivery .....                   | 12          |
| 8                  | Packaging .....                  | 12          |
| 9                  | Marking .....                    | 12          |
| Bibliography ..... |                                  | 13          |
