Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols and abbreviations 7

5 Methodological principles 7
5.1 Language and notation adopted for the specification of the model (informative) 7
5.2 UML Class Diagram notation guidelines and profile (informative) 8
5.3 Clusters of objects in the information model 9
5.4 Operational and descriptive information: classifications, knowledge and its instantiation 10
5.5 DataTypes 12
5.6 Organization of the document 13

6 General characteristics of the model 14
6.1 Common structure of each information object: the GenericHisaClass 14
6.2 UML diagram 15
6.3 Specification of Generic HISA Class 16
6.3.1 General 16
6.3.2 Class: Set of structured attributes 16
6.3.3 Class: Set of class specific attributes 16
6.3.4 Class: Set of common attributes 16
6.3.5 Class: Set of system attributes 17
6.3.6 Class: Set of version attributes 17
6.3.7 Class: Extended attributes 18
6.3.8 Class: State changes 18
6.3.9 Class: Business rules 19
6.3.10 Class: Classification criteria 19

7 The reference information models 20
7.1 Classification objects 20
7.1.1 Scope 20
7.1.2 UML information model 20
7.1.3 Specification of the individual classes 21
7.2 Subject of care objects 24
7.2.1 Scope 24
7.2.2 UML information model 24
7.2.3 Specification of the individual classes 25
7.3 Activity management objects 30
7.3.1 Scope 30
7.3.2 UML information model 30
7.3.3 Specification of the individual classes 31
7.4 Clinical and health information objects 38
7.4.1 Scope 38
7.4.2 UML information model 38
7.4.3 Specification of the individual classes 39
7.5 Resource management objects 44
7.5.1 Scope 44
7.5.2 UML information model 44

7.5.3 Specification of the individual classes **45**

7.6 User and authorization objects **50**
7.6.1 Scope **50**
7.6.2 UML information model **51**
7.6.3 Specification of the individual classes **52**
7.7 Messaging Objects **56**
7.7.1 Scope **56**
7.7.2 UML information model **57**
7.7.3 Specification of the individual classes **57**

Annex A (informative) **Mappings between HISA and GPIC** **61**

Bibliography **63**
