DIN EN ISO 20857:2013-08 (E)

Sterilization of health care products - Dry heat - Requirements for the development, validation and routine control of a sterilization process for medical devices (ISO 20857:2010)

Contents

Page

Foreword 4

Introduction 5

1 Scope 7
1.1 Inclusions 7
1.2 Exclusions 7

2 Normative references 8

3 Terms and definitions 8

4 Quality management system elements 16
4.1 Documentation 16
4.2 Management responsibility 16
4.3 Product realization 16
4.4 Measurement, analysis and improvement -- Control of nonconforming product 16

5 Sterilizing agent characterization 17
5.1 Sterilizing agent 17
5.2 Microbicidal effectiveness 17
5.3 Material effects 17
5.4 Environmental considerations 17

6 Process and equipment characterization 17
6.1 Process characterization 17
6.2 Equipment characterization 17

7 Product definition 19
7.1 General 19
7.2 Product safety and performance 19
7.3 Packaging considerations 20
7.4 Microbiological quality 20
7.5 Product family 20
7.6 Biological safety 20

8 Process definition 21

9 Validation 22
9.1 General 22
9.2 Installation qualification 22
9.3 Operational qualification 22
9.4 Performance qualification 22
9.5 Additional sterilization systems 24
9.6 Review and approval of validation 24

10 Routine monitoring and control 25
10.1 Routine control 25
10.2 Routine monitoring 25

10.3 Process monitoring locations 26

11 Product release from sterilization/depyrogenation 27

12 Maintaining process effectiveness 27
12.1 General 27
12.2 Recalibration 27
12.3 Maintenance of equipment 27
12.4 Requalification 27
12.5 Assessment of change 28

Annex A (informative) Guidance on the application of this International Standard 29

Annex B (informative) Process definition based on inactivation of the microbial population in its natural state (bioburden-based approach) 52

Annex C (informative) Process definition based on the inactivation of reference micro- organisms and knowledge of bioburden (combined bioburden/biological indicator approach) 54

Annex D (informative) Conservative process definition based on inactivation of reference microorganisms (overkill method) 57

Annex E (informative) Process development 60

Bibliography 63

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 90/385/EEC on Active Implantable Medical Devices 65

Annex ZB (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC on Medical Devices 66

Annex ZC (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 98/79/EC on in vitro diagnostic medical devices 67
