ISO 16571:2014-03 (E)

Systems for evacuation of plume generated by medical devices

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 General requirements 5

5 Design requirements 6
5.1 Components 6
5.2 Connectors 6
5.3 Supply system for central plume evacuation 8

6 Indicating systems 8

7 Plume extraction system pipeline 8
7.1 Mechanical integrity 8
7.2 Pressures and flows 8
7.3 Shut-off valves 9

8 System components 9
8.1 Capture device 9
8.2 Transfer tubing -- Kinking 10
8.3 Filtration system 10
8.4 Flow-generating device 10
8.5 Exhaust system 10
8.6 Control system 11
8.7 Pipelines, tubing, and other components 11

9 Terminal units 11

10 Marking and colour coding 12
10.1 Marking 12
10.2 Colour coding 12

11 Pipeline installation 12

12 Testing,commissioning,andcertificationofthePES 12
12.1 General requirements for tests 12
12.2 Noise testing 12
12.3 Tests, inspections, and checks of a fixed (local stationary or central) PES 13
12.4 Tests, inspections, and checks of portable and mobile PES 14

13 Informationtobesuppliedbythemanufacturer 15
13.1 General 15
13.2 Instructions for use 15
13.3 Operational management information 16

Annex A (informative) Types of plume evacuation systems 17

Annex B (informative)Healthcarefacilitypoliciesandprocedures 23

Annex C (informative) Typical plume capture devices and transfer tubings 26

Annex D (informative)Riskmanagementchecklist 27

Annex E (informative) Operational management 28

Annex F (informative) Rationale 29

Annex G (informative) Example of procedure for testing and commissioning for a central system .. 30

Annex H (informative)Guidelinesforflow-generatingdevicesconsistingoffansorblowers 32
