

DIN EN 14885:2015-11 (E)

Chemical disinfectants and antiseptics - Application of European Standards for chemical disinfectants and antiseptics

Contents

Page

European foreword	3
Introduction	5
1 Scope	6
2 Normative references	7
3 Terms and definitions	8
3.1 Chemical disinfectant or antiseptic procedures and product types	8
3.2 Chemical disinfectant or antiseptic action	9
3.3 General terms	12
4 Procedures for claiming activity	12
4.1 Category of tests	12
4.2 General	13
4.3 Chemical disinfectants and antiseptics for use in the medical area	14
4.3.1 General	14
4.3.2 Fields of application / Standards necessary to be passed for basic and additional label claims	15
4.4 Chemical disinfectants and antiseptics for use in the veterinary area	25
4.5 Chemical disinfectants and antiseptics for use in food, industrial, domestic and institutional areas	32
5 Precision of the test methods (Repetitions)	50
6 Proficiency testing	50
7 Minimum information for the user including labelling regarding efficacy claims and use recommendations	50
8 Changes in European Standards	51
8.1 Revision of European Standards	51
Annex A (informative) Recommendations on the use of terms and definitions in the area of disinfection and antiseptics	52
Annex B (informative) Recommendations on claims of activity on the basis of tests additional to or other than the tests specified in this European Standard	54
Annex C (informative) Phase 3 tests	55
C.1 General	55
C.2 Comparison with phase 2 tests	55
C.3 Requirement for a Phase 3 Test	55
C.4 Scope of Phase 3 tests	56
C.5 Safety	56
C.6 Design of a Phase 3 Test	57
C.7 Performance of a Phase 3 Test	58
C.8 Results of a Phase 3 Test	58
