DIN EN ISO 7396-1:2016-09 (E)

Medical gas pipeline systems - Part 1: Pipeline systems for compressed medical gases and vacuum (ISO 7396-1:2016)

Contents

Page

European foreword ... **5**

Annex ZA (informative) **Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC on Medical devices** ... **6**

Foreword ... **8**

Introduction ... **9**

1 (*) Scope ... **11**

2 Normative references ... **12**

3 Terms and definitions ... **13**

4 General requirements ... **19**
4.1 (*) Safety ... 19
4.2 (*) Alternative construction ... 20
4.3 Materials ... 20
4.4 System design ... 22
4.4.1 General ... 22
4.4.2 Extensions and modifications of existing pipeline systems ... 22

5 Supply systems ... **23**
5.1 System components ... 23
5.2 General requirements ... 23
5.2.1 Capacity and storage ... 23
5.2.2 Continuity of supply ... 23
5.2.3 Primary source of supply ... 24
5.2.4 Secondary source of supply ... 24
5.2.5 Reserve source(s) of supply ... 24
5.2.6 Means of pressure relief ... 25
5.2.7 Maintenance supply assembly ... 25
5.2.8 Pressure regulators ... 26
5.2.9 (*)Ozone Sterilizers ... 26
5.3 Supply systems with cylinders, cylinder bundles or high-pressure reservoir(s) ... 26
5.4 Supply systems with cryogenic or non-cryogenic vessels ... 26
5.5 Supply systems for air ... 27
5.5.1 General requirements ... 27
5.5.2 Supply systems with air compressor(s) ... 28
5.5.3 Supply systems with proportioning unit(s) ... 31
5.6 Supply systems with oxygen concentrator(s) ... 33
5.6.1 General requirements ... 33
5.6.2 Primary source of supply ... 33
5.6.3 Secondary source of supply ... 33
5.6.4 Reserve source of supply ... 34
5.6.5 Specifications for oxygen 93 ... 34
5.6.6 Oxygen concentrator unit ... 35
5.6.7 Oxygen 93 reservoirs ... 35
5.6.8 Oxygen analysers ... 35
5.6.9 Local filling of permanently attached high-pressure reservoir(s), acting as reserve source of supply ... 36
5.7 Supply systems for vacuum ... 37
5.8 Location of supply systems ... 38
5.9 Location of cylinder manifolds ... 38
5.10 Location of stationary cryogenic vessels ... 39

6 Monitoring and alarm systems 39
6.1 General 39
6.2 Installation requirements 39
6.3 Monitoring and alarm signals 40
6.3.1 General 40
6.3.2 Auditory signals 40
6.3.3 Visual signals 40
6.3.4 Emergency and operating alarm characteristics 40
6.3.5 Information signals 41
6.3.6 Remote alarm extensions 41
6.4 Provision of operating alarms 41
6.5 Provision of emergency clinical alarms 42
6.6 (*) Provision of emergency operating alarms 42

7 Pipeline distribution systems 43
7.1 Mechanical resistance 43
7.2 Distribution pressure 43
7.3 Low-pressure hose assemblies and low-pressure flexible connections 44
7.4 Double-stage pipeline distribution systems 45

8 Shut-off valves 45
8.1 General 45
8.2 Service shut-off valves 46
8.3 Area shut-off valves 46

9 Terminal units, gas-specific connectors, medical supply units, pressure regulators and pressure gauges 48

10 Marking and colour coding 48
10.1 Marking 48
10.2 Colour coding 48

11 Pipeline installation 49
11.1 General 49
11.2 Pipeline supports 50
11.3 Pipeline joints 50
11.4 Extensions and modifications of existing pipeline systems 51

12 Testing and commissioning 51
12.1 General 51
12.2 General requirements for tests 52
12.3 Inspections and checks before concealment 52
12.4 Tests, checks and procedures before use of the system 52
12.5 Requirements for inspections and checks before concealment 53
12.5.1 Inspection of marking and pipeline supports 53
12.5.2 Check for compliance with design specifications 53
12.6 Requirements for tests, checks and procedures before use of the system 53
12.6.1 General 53
12.6.2 (*) Tests of area shut-off valves for leakage and closure and checks for correct zoning and correct identification 55
12.6.3 Test for cross-connection 55
12.6.4 Test for obstruction and flow 56
12.6.5 Checks of terminal units and NIST, DISS or SIS connectors for mechanical function, gas specificity and identification 57
12.6.6 Tests or checks of system performance 57

12.6.7 (*) Tests of pressure-relief valves ... 57
12.6.8 Tests of all sources of supply ... 58
12.6.9 Tests of monitoring and alarm systems ... 58
12.6.10 Test for particulate contamination of pipeline distribution systems ... 58
12.6.11 Tests of the quality of medical air produced by supply systems with air compressor(s) ... 59
12.6.12 Tests of the quality of air for driving surgical tools produced by supply systems with air compressor(s) ... 59
12.6.13 Tests of the quality of medical air produced by supply systems with proportioning unit(s) ... 59
12.6.14 Tests of the quality of oxygen 93 produced by supply systems with oxygen concentrator(s) ... 59
12.6.15 Filling with specific gas ... 59
12.6.16 Tests of gas identity ... 59
12.6.17 Verification of restart after power supply failure ... 60
12.7 Statement of compliance to this part of ISO 7396 ... 60

13 Information to be supplied by the manufacturer ... 60
13.1 General ... 60
13.2 Instructions for installation ... 60
13.3 Instructions for use ... 60
13.4 Operational management information ... 61
13.5 "As-installed" drawings ... 62
13.6 Electrical diagrams ... 62

Annex A (informative) **Schematic representations of typical supply systems and area distribution systems ... 63**

Annex B (informative) **Guidelines for location of cylinder manifolds, cylinder storage areas and stationary vessels for cryogenic or non-cryogenic liquids ... 93**

Annex C (informative) **Example of procedure for testing and commissioning ... 94**

Annex D (informative) **Typical forms for documenting compliance of the pipeline systems for compressed medical gas and vacuum ... 107**

Annex E (informative) **Temperature and pressure relationships ... 137**

Annex F (informative) **Risk management checklist ... 139**

Annex G (informative) **Operational management ... 156**

Annex H (informative) **Rationale ... 176**

Annex I (informative) **Rationale for compressor hazards ... 179**

Annex J (informative) **Considerations for implementation and use of oxygen 93 ... 180**

Annex K (informative) **Manufacture of medical gases on site, Responsibility for medical gas quality ... 182**

Bibliography ... 185
