Page

Foreword iv

Introduction v

1 Scope 1

2 Termsanddefinitions 2

3 Abbreviated terms 5

4 Types of products 5
4.1 General 5
4.2 Products that come into direct contact with biological stains or material potentially containing human DNA 5
4.3 Chemicals, reagents, solvents, and some disposables involved in the analysis of human DNA 6
4.4 Protective barrier products that are used during the collection and analysis of biological material 6

5 Quality management systems 6
5.1 General 6
5.2 Documents and records 6
5.3 Authorization 7
5.4 Subcontracting of work and purchase of components 7
5.5 Control of nonconforming product 7
5.6 Corrective and preventive action 8
5.7 Staff contamination detection provision 8

6 Human DNA contamination risk management 8
6.1 General 8
6.2 Risk assessment 8
6.3 Risk mitigation 10
6.4 Risk control measures 10
6.4.1 Equipment 10
6.4.2 Personnel 10
6.4.3 Cleaning and maintenance 10

7 Environmental human DNA monitoring 11

8 Requirements for products subject to post-production treatment 11

9 Requirements for products not subject to post-production treatment 12
9.1 Product testing 12
9.2 Batch records 12

10 Product packaging, labelling, and documentation 12

Annex A (normative) Compliance testing 13

Annex B (informative) Guidance on the effectiveness of post-production treatments currently used in the manufacture of products 15

Annex C (informative)RelevantmarkersforDNAprofiling 17
