## Minimizing the risk of human DNA contamination in products used to collect, store and analyze biological material for forensic purposes - Requirements

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Terms and definitions .....	2
3	Abbreviated terms .....	5
4	Types of products .....	5
4.1	General .....	5
4.2	Products that come into direct contact with biological stains or material potentially containing human DNA .....	5
4.3	Chemicals, reagents, solvents, and some disposables involved in the analysis of human DNA .....	6
4.4	Protective barrier products that are used during the collection and analysis of biological material .....	6
5	Quality management systems .....	6
5.1	General .....	6
5.2	Documents and records .....	6
5.3	Authorization .....	7
5.4	Subcontracting of work and purchase of components .....	7
5.5	Control of nonconforming product .....	7
5.6	Corrective and preventive action .....	8
5.7	Staff contamination detection provision .....	8
6	Human DNA contamination risk management .....	8
6.1	General .....	8
6.2	Risk assessment .....	8
6.3	Risk mitigation .....	10
6.4	Risk control measures .....	10
6.4.1	Equipment .....	10
6.4.2	Personnel .....	10
6.4.3	Cleaning and maintenance .....	10
7	Environmental human DNA monitoring .....	11
8	Requirements for products subject to post-production treatment .....	11
9	Requirements for products not subject to post-production treatment .....	12
9.1	Product testing .....	12
9.2	Batch records .....	12
10	Product packaging, labelling, and documentation .....	12
Annex A (normative)	Compliance testing .....	13
Annex B (informative)	Guidance on the effectiveness of post-production treatments currently used in the manufacture of products .....	15

<b>Annex C (informative) Relevant markers for DNA profiling .....</b>	<b>17</b>
<b>Bibliography .....</b>	<b>18</b>
