

# ISO 15675:2016-08 (E)

## Cardiovascular implants and artificial organs - Cardiopulmonary bypass systems - Arterial blood line filters

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....  | 1           |
| 3                  | Terms and definitions .....   | 1           |
| 4                  | Requirements .....  | 3           |
| 4.1                | Biological characteristics .....  | 3           |
| 4.1.1              | Sterility and non-pyrogenicity .....                                    | 3           |
| 4.1.2              | Biocompatibility .....  | 3           |
| 4.2                | Physical characteristics .....  | 3           |
| 4.2.1              | Blood pathway integrity .....   | 3           |
| 4.2.2              | Blood volume .....  | 3           |
| 4.2.3              | Connectors .....  | 3           |
| 4.3                | Performance characteristics .....                                       | 3           |
| 4.3.1              | Blood cell damage .....   | 3           |
| 4.3.2              | Filtration efficiency .....   | 3           |
| 4.3.3              | Flow rate capacity .....  | 4           |
| 4.3.4              | Shelf life .....  | 4           |
| 4.3.5              | Air-handling capability .....   | 4           |
| 5                  | Tests and measurements to determine compliance with this document ..... | 4           |
| 5.1                | General .....   | 4           |
| 5.2                | Biological characteristics .....  | 4           |
| 5.2.1              | Sterility and non-pyrogenicity .....                                    | 4           |
| 5.2.2              | Biocompatibility .....  | 4           |
| 5.3                | Physical characteristics .....  | 4           |
| 5.3.1              | Blood pathway integrity (sterile final assembly) .....                  | 4           |
| 5.3.2              | Blood volume .....  | 5           |
| 5.3.3              | Connectors .....  | 5           |
| 5.4                | Performance characteristics .....                                       | 5           |
| 5.4.1              | Blood cell damage .....   | 5           |
| 5.4.2              | Filtration efficiency .....   | 6           |
| 5.4.3              | Filter flow rate .....  | 6           |
| 5.4.4              | Shelf life .....  | 6           |
| 5.4.5              | Air-handling capability .....   | 6           |
| 6                  | Information supplied by the manufacturer .....                          | 7           |
| 6.1                | Information on the arterial blood line filter .....                     | 7           |
| 6.2                | Information on the packaging .....                                      | 7           |
| 6.2.1              | Information on the unit container .....                                 | 7           |
| 6.2.2              | Information on the shipping container .....                             | 7           |
| 6.3                | Information in the accompanying documents .....                         | 8           |
| 6.4                | Information in the accompanying documents in a prominent form .....     | 8           |
| 7                  | Packaging .....   | 8           |
| Bibliography ..... |   | 9           |
