Anaesthetic and respiratory equipment - General requirements for airways and related equipment

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	General requirements for airways and related equipment	3
4.1	* Risk management	3
4.2	Usability	3
4.3	Clinical evaluation	4
4.4	Biophysical or modelling research	4
5	Materials	4
5.1	Biological safety testing	4
5.2	Intended use and environmental conditions	4
5.3	Leaching	4
5.4	Cleaning, disinfecting or sterilizing agents	4
5.5	Phthalates	5
5.6	Natural rubber (latex)	5
5.7	Gas compatibility	5
5.8	* Durability of marking	6
5.9	Resistance to deterioration	6
5.10	Magnetic resonance imaging (MRI) compatibility	6
6	Design requirements for airways and related equipment	6
6.1	Mechanical safety	6
6.2	Medical electrical equipment safety	7
6.3	Pneumatic safety	7
6.4	Protection against inadvertent adjustments	7
6.5	* Prevention of electrostatic charges	7
6.6	Device lifetime	7
7	Requirements for airways and related equipment supplied sterile	8
7.1	Sterility assurance	8
8	Packaging	8
9	Information supplied by the manufacturer	8
9.1	Marking	8
9.1.1	General	8
9.1.2	Marking on controls and instruments	10
9.2	Instructions for use	10
Annex A (informative) Rationale		13
Annex B (informative) Hazard identification for risk assessment		16
Bibliography		21
