Health informatics - Medication management concepts and definitions

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	3
5	General process	4
6	Data elements relevant to medication management	5
6.1	General	5
6.2	Prescription data	5
6.3	Dispense data	6
6.4	Medication administration data	6
6.5	Medication statement data	6
6.6	Health concern data	7
6.7	Contraindication risks	7
6.8	Specific laboratory results	7
6.9	Drug and alcohol usage	8
6.10	Smoking habits	8
7	Process steps	8
7.1	The act of gathering data	8
7.2	The act of gathering sense of the data	8
7.3	The act of verification of the data	9
7.4	The act of adding data to the collection	9
7.5	The acts of carrying out the therapy and evaluating the outcome	10
8	Definitions of medication management	10
8.1	General	10
8.2	Medication lists	11
8.2.1	General	11
8.2.2	Unreconciled medication list	11
8.2.3	Reconciled medication list	11
8.2.4	Aggregated medication list	12
8.3	Medication profile	12
8.4	Medication management profile	12
8.5	Medication management	13
9	Example use case -- Storyboard patient intake at hospital admission	13
