Medical laboratories - Requirements for collection, transport, receipt, and handling of samples

Contents		Page
Foreword		vi
Introduction		vii
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Quality management	3
5	Pre-examination processes relating to patient samples	4
5.1	General	4
5.2	Laboratory test is ordered	5
5.3	Sample request generation process	5
5.4	Process for providing instructions to patients	5
5.5	Patient identification process	5
5.6	Preparation for sample collection process	5
5.7	Primary sample collection and labelling process	5
5.8	Preparation for transportation process	5
5.9	Sample transport process	5
5.10	Sample receipt process	5
5.11	Process for preparing sample for examination	5
6	Infrastructure and environmental conditions	6
6.1	General	6
6.2	Design	6
6.2.1	General	6
6.2.2	Safety and accessibility	6
6.2.3	Privacy and confidentiality	7
6.2.4	Equipment, supplies and storage	7
6.3	Facility maintenance and environmental conditions	7
6.4	Personnel facilities	7
7	Equipment and supplies	7
7.1	General	7
7.2	Equipment acceptance testing	7
7.3	Inspection and storage	8
7.4	Inventory management	8
7.5	Equipment maintenance and repair	8
7.6	Equipment operation	8
7.7	Computer equipment	9
7.8	Equipment records	9
8	Infection prevention and control (biosafety)	10
8.1	Personal protective equipment	10
8.2	Hand hygiene	10
8.3	Personnel practices	10
8.4	Safe disposal	10
8.5	Patient protection	11

8.6	Cleaning and disinfection	11
8.7	Special precautions	11
9	Personnel	11
9.1	General	11
9.2	Training and competence	11
9.2.1	Personnel training	11
9.2.2	Competence and continuing education	12
9.3	Confidentiality and access to information	12
9.4	Personnel records	12
10	Information for patients and users of services	13
10.1	Information to be provided by laboratories that will receive the samples	13
10.2	Information for patients	14
11	Request form	15
11.1	Request form information	15
11.2	Verbal requests	16
11.3	Transcription	16
12	Patient identification	16
12.1	General	16
12.2	Routine patient identification	16
12.3	Patient identification in medical emergency situations	17
12.4	Patient identification of babies and young children	17
13	Identification of samples	17
14	Sample collection	18
14.1	General	18
14.2	Informed consent	18
14.3	Instructions for collection activities	19
14.4	Handling urgent requests	19
14.5	Blood sample collection	19
14.5.1	General	19
14.5.2	Order of draw	20
14.5.3	Special considerations when performing venipuncture	20
14.5.4	Adult capillary puncture	20
14.5.5	Paediatric venipuncture	21
14.5.6	Paediatric capillary puncture	21
14.6	Other samples	22
15	Sample integrity and stability	22
15.1	Sample integrity	22
15.2	Stability	23
15.3	Stabilization	23
16	Transport of samples	23
16.1	General	23
16.2	Sample transport	24
16.3	Quality monitoring	24
17	Sample receipt and assessment	24
17.1	General	24
17.2	Criteria for sample acceptance or rejection	24
17.3	Sample label confirmation	25
17.3.1	General	25
17.3.2	Managing nonconformities	25
17.4	Records of sample receipt	26
17.5	Sample tracking	26
17.6	Urgent samples	26

17.7	Chain of Custody	26
18	Sample storage prior to examination	26
19	Customer satisfaction	27
20	Identification and control of nonconformities	27
20.1	Identification of nonconformities	27
20.2	Records of nonconformities	27
21	Performance indicators	28
22	Documents and records	28
22.1	General	28
22.2	Documents	29
22.3	Records	29
Annex A (informative) Your five moments for hand hygiene		30
Annex B (informative) Disinfectants		31
