ISO 10524-1:2018-01 (E)

Pressure regulators for use with medical gases - Part 1: Pressure regulators and pressure regulators with flow-metering devices

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Nomenclature 4

5 General requirements 4
5.1 Safety 4
5.2 Usability 4
5.3 Alternative construction 4
5.4 Materials 4

6 Design requirements 5
6.1 General 5
6.2 Indicator for cylinder pressure or cylinder content 6
6.2.1 General 6
6.2.2 Pressure gauges, pressure indicators, and flowgauges 6
6.3 Integrated electronic device 6
6.4 Connections 6
6.4.1 Inlet connector 6
6.4.2 Outlet connectors 7
6.5 * Requirements for outlet pressure 7
6.5.1 Pressure outlet 7
6.5.2 Flow outlet 8
6.6 Flow-metering device 8
6.7 Flow control and indication 8
6.8 Pressure-adjusting device 8
6.9 * Filtration 9
6.10 * Pressure-relief device 9
6.11 Leakage 9
6.12 Mechanical strength 10
6.12.1 Resistance of the high-pressure side 10
6.12.2 Resistance of the low-pressure side to pneumatic pressure 10
6.12.3 Resistance of the low-pressure side to inlet pressure, P1 10
6.13 * Resistance to ignition 10
6.14 Requirements for pressure regulators with flowmeters 10
6.14.1 Calibration 10
6.14.2 Accuracy of flow 10
6.14.3 Stability of flow 11
6.14.4 Legibility 11
6.14.5 Flow control device 11
6.15 Requirements for PRESSURE REGULATORS fitted with flowgauges 11
6.15.1 Calibration 11
6.15.2 Accuracy of flow 11
6.15.3 Stability of flow 11

6.16 Requirements for pressure regulators fitted with fixed orifices 12
6.16.1 Stability and accuracy of flow 12
6.16.2 * Flow setting torque 12
6.16.3 Removal of a fixed orifice 12
6.16.4 Legibility 12
6.17 Endurance 12
6.17.1 Flow selector 12
6.17.2 Pressure regulator 13

7 Construction requirements 13
7.1 * Cleanliness 13
7.2 Lubricants 13
7.3 Loosening torques 13

8 Test methods for type tests 14
8.1 General conditions 14
8.1.1 General 14
8.1.2 Ambient conditions 14
8.1.3 Test gas 14
8.1.4 Reference conditions 14
8.2 Test schedule 14
8.3 Test methods for outlet pressure 16
8.3.1 Test equipment 16
8.3.2 Test methods for determining outlet pressure limits for a pressure regulator fitted with a pressure outlet 17
8.3.3 Test method for determining the outlet pressure limit for a pressure regulator fitted with a flow outlet 18
8.4 Test method for a pressure-relief device 18
8.5 Test methods for leakage 18
8.5.1 External leakage 18
8.5.2 Internal leakage 19
8.6 Test method for mechanical strength 19
8.6.1 Test method for the high-pressure side 19
8.6.2 Test method for resistance of the low-pressure side to pneumatic pressure 19
8.6.3 Test method for the resistance of the low pressure side to P1 19
8.7 Test method for resistance to ignition 20
8.7.1 General 20
8.7.2 Test procedure for adjustable and pre-set pressure regulators 20
8.8 Test method for accuracy of flow of pressure regulators fitted with flowmeters or flowgauges 20
8.9 Test method for the stability of flow of pressure regulator fitted with flowmeters or flowgauges 20
8.10 Test method for stability and accuracy of flow of pressure regulators fitted with fixed orifices 21
8.11 Test method for flow setting and loosening torques 21
8.11.1 General 21
8.11.2 Test method for verifying no stable position between two settings 21
8.12 Test method for durability of markings and colour coding 21
8.13 *Flow selector endurance test 21
8.14 Pressure regulator endurance test 22

9 Marking, colour coding, and packaging 22
9.1 Marking 22
9.2 Colour coding 24
9.3 Packaging 24

10 Information to be supplied by the manufacturer 24

Annex A (informative) Rationale 26

Annex B (informative) Reported regional and national deviations of colour coding and nomenclature for medical gases **31**

Bibliography **33**
