

ISO/TS 21089:2018-04 (E)

Health informatics - Trusted end-to-end information flows

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	25
5	Truth, trust, end-to-end information flows and foundations of interoperability	27
6	Trust characteristics in end-to-end information flow	28
7	The trust constituency	29
8	Principles and objectives	32
8.1	Ensured trust	32
8.2	Trust constituency	32
8.3	Health record rights	33
8.4	Health record obligations	33
8.5	Health record composition	34
8.6	Human and business agents and their accountable actions	34
8.7	Software and device agents and their accountable actions	34
8.8	Scope of accountability	34
8.9	Provenance	35
8.10	Authentication	35
8.11	Auditability	36
8.12	Chain of trust	36
8.13	Faithfulness, permanence, persistence and indelibility	36
8.14	Data definition, data registry	36
8.15	Data integrity	36
8.16	Completeness	36
9	Downstream/upstream information flow perspectives	37
9.1	Downstream information flow perspective -- Subject of care	37
9.2	Downstream information flow perspective -- Accountable agent(s) for health record content	38
9.3	Upstream perspective -- Accountable agent(s) for health record access/view	39
10	Agents, actions and corresponding persistent record entries	39
10.1	Agent takes action	39
10.2	Agent documents action taken	40
10.3	Agent stewards the record entry	40
11	Key contexts for action instances and record entry instances	41
11.1	Identity Context	41
11.2	Accountability Context	41
11.3	Data Integrity Context	41
11.4	Clinical Context	41

11.5	Administrative/operational context	42
12	Roles and relationships (examples)	42
12.1	Subject of care and provider relationships	42
12.2	Health services	42
12.3	Health record relationships	42
12.4	Individuals, organizations and business unit relationships	43
12.5	Inter-healthcare professional relationships	43
13	Record lifecycle events and CRUD (create, read, update, delete)	44
14	Key lifecycle events in trusted end-to-end information flows	46
15	Record lifecycle events and action instances	47
15.1	Initial instance	47
15.1.1	Initial action instance	47
15.1.2	Record lifecycle event -- Originate/retain record entry instance(s)	48
15.2	Subsequent instance	50
15.2.1	Subsequent action instance	50
15.2.2	Record lifecycle event -- Amend (update) record entry instance(s)	50
15.3	Record lifecycle event -- Transform/translate	51
15.4	Record lifecycle event -- Attest	52
15.5	Record lifecycle event -- Access/view	53
15.6	Record lifecycle event -- Report (output)	54
15.7	Record lifecycle event -- Disclose	54
15.8	Record lifecycle event -- Transmit	54
15.9	Record lifecycle event -- Receive/retain	56
15.10	Record lifecycle event -- De-identify (anonymize)	57
15.11	Record lifecycle event -- Pseudonymize	58
15.12	Record lifecycle event -- Re-identify	60
15.13	Record lifecycle event -- Extract	61
15.14	Record lifecycle event -- Archive	62
15.15	Record lifecycle event -- Restore (from archive)	63
15.16	Record lifecycle event -- Destroy/delete	64
15.17	Record lifecycle event -- Deprecate	65
15.18	Record lifecycle event -- Reactivate (from delete or deprecate)	66
15.19	Record lifecycle event -- Merge	67
15.20	Record lifecycle event -- Unmerge	68
15.21	Record lifecycle event -- Link	69
15.22	Record lifecycle event -- Unlink	69
15.23	Record lifecycle event -- Add legal hold	70
15.24	Record lifecycle event -- Remove legal hold	71
15.25	Record lifecycle event -- Verify	72
15.26	Record lifecycle event -- Encrypt	73
15.27	Record lifecycle event -- Decrypt	74
	Annex A (informative) HL7 Fast Health Interoperable Resources (FHIR)	76
	Annex B (informative) Lifecycle metadata captured in FHIR resources	78
	Annex C (informative) Sample lifecycle event sequence with FHIR resources	82
	Annex D (informative) Lifecycle Event Sequence -- Point of Origination to Point of Access (Example)	84
	Bibliography	85
