ISO 20696:2018 (E)

Sterile urethral catheters for single use

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Intended performance

5 General requirements

- 5.1 Risk management
- 5.2 Biocompatibility
- 5.3 Detectability
- 5.4 Surface finish
- 5.5 Size designation
- 5.5.1 General
- 5.5.2 Outer diameter
- 5.5.3 Effective shaft lengths
- 5.6 MRI compatibility
- 5.7 Connector
- 5.8 Sterilization

6 Specific requirements

- 6.1 Strength
- 6.2 Connector security
- 6.3 Balloon safety
- 6.4 Catheter inflation lumen integrity and volume maintenance
- 6.4.1 General
- 6.4.2 Compliant balloon
- 6.4.3 Non-compliant balloon
- 6.5 Flow rate
- 6.6 Corrosion resistance
- 6.7 Kink stability
- 6.8 Peak tensile force
- 6.9 Inflated balloon resistance to traction

7 Information to be supplied by the manufacturer

- 7.1 General
- 7.2 Marking on the device and/or packaging
- 7.3 Instructions for use

Annex A (normative) Test method for determining the strength of the catheter

- A.1 Principle
- A.2 Reagents
- A.3 Apparatus
- A.4 Procedure
- A.5 Test report

Annex B (normative) Test method for determining the security of fit of the drainage funnel

- B.1 Principle
- B.2 Apparatus

B.3 Procedure
B.4 Test report

Annex C (normative) Test method for determining balloon safety

C.1 Principle
C.2 Reagents
C.3 Apparatus
C.4 Procedure
C.5 Test report

Annex D (normative) Test method for determining inflation lumen leakage and/or function and/or balloon deflation (catheter with compliant balloon)

D.1 Principle
D.2 Apparatus and reagents
D.3 Procedure
D.4 Test report

Annex E (normative) Test method for determination of flow rate through catheter

E.1 Principle
E.2 Reagent
E.3 Apparatus
E.4 Procedure
E.5 Test report

Annex F (normative) Test method for corrosion resistance

F.1 Principle
F.2 Reagents
F.3 Apparatus
F.4 Procedure
F.5 Test report

Annex G (informative) Test method for determining kink stability

G.1 Principle
G.2 Apparatus
G.3 Procedure
G.4 Test report

Annex H (normative) Test method for determining peak tensile force of urethral catheter

H.1 Principle
H.2 Apparatus
H.3 Procedure
H.4 Test report

Annex I (normative) Test method for determining balloon size deflation reliability (catheter with non-compliant balloon)

I.1 Principle
I.2 Apparatus and reagents
I.3 Procedure
I.4 Test report

Annex J (normative) Test method for determining inflated balloon resistance to traction

J.1 Principle
J.2 Apparatus
J.3 Procedure
J.4 Test report
