

DIN EN ISO 11607-1:2020-05 (E)

Packaging for terminally sterilized medical devices - Part 1: Requirements for materials, sterile barrier systems and packaging systems (ISO 11607-1:2019)

Contents	Page
European foreword	3
Foreword	4
Introduction	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 General requirements	11
4.1 Quality systems	11
4.2 Risk management	11
4.3 Sampling	11
4.4 Test methods	11
4.5 Documentation	12
5 Materials, preformed sterile barrier systems and sterile barrier systems	12
5.1 General requirements	12
5.2 Microbial barrier properties	15
5.3 Compatibility with the sterilization process	16
5.4 Labelling system	16
5.5 Storage and transport of materials and preformed sterile barrier systems	16
6 Design and development for packaging systems	17
6.1 General	17
6.2 Design	17
7 Usability evaluation for aseptic presentation	18
8 Packaging system performance and stability	19
8.1 General	19
8.2 Packaging system performance testing	19
8.3 Stability testing	20
9 Packaging system validation and changes	20
10 Inspection immediately prior to aseptic presentation	21
11 Information to be provided	21
Annex A (informative) Guidance on medical packaging	22
Annex B (informative) Standardized test methods, guides and procedures that can be used to demonstrate conformity with the requirements of this document	25
Annex C (normative) Test method for resistance of impermeable materials to the passage of air	36
Annex D (informative) Environmental aspects	37
Annex E (informative) Draft guidance on ways to differentiate a sterile barrier system from protective packaging	38
Bibliography	43
