European foreword 3

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 General considerations 10

5 Outside the laboratory 11
5.1 Specimen collection 11
5.1.1 General 11
5.1.2 Information about the specimen donor/patient 11
5.1.3 Information about the specimen 11
5.1.4 Specimen processing 11
5.2 Transport requirements 12

6 Inside the laboratory 12
6.1 Information about the reception of the specimen 12
6.2 Formalin fixation of the specimen or sample(s) 13
6.3 Evaluation of the pathology of the specimen and selection of the sample(s) 14
6.4 Post-fixation of frozen samples 15
6.5 Decalcification 15
6.6 Processing and paraffin embedding 15
6.7 Storage requirements 15
6.8 Isolation of RNA 16
6.8.1 General 16
6.8.2 General information for RNA isolation procedures 16
6.8.3 Using commercial kits 17
6.8.4 Using the laboratories' own protocols 17
6.9 Quantity and quality assessment of isolated RNA 18
6.10 Storage of isolated RNA 18
6.10.1 General 18
6.10.2 Using commercially available kits for RNA isolation 19
6.10.3 Using the laboratory's own protocols for RNA isolation 19

Annex A (informative) Quality control of RNA extracted from formalin-fixed and paraffin-embedded tissue samples: implications for RT-qPCR based examinations 20
