ISO 25424:2018 (E)

Sterilization of health care products — Low temperature steam and formaldehyde — Requirements for development, validation and routine control of a sterilization process for medical devices

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Quality management system elements

- 4.1 General
- 4.2 Documentation
- 4.3 Management responsibility
- 4.4 Product realization
- 4.5 Control of non-conforming product

5 Sterilizing agent characterization

- 5.1 General
- 5.2 Sterilizing agent
- 5.3 Microbicidal effectiveness
- 5.4 Material effects
- 5.5 Environmental considerations

6 Process and equipment characterization

- 6.1 General
- 6.2 Process
- 6.3 Equipment

7 Product definition

8 Process definition

9 Validation

- 9.1 General
- 9.2 Installation qualification
- 9.2.1 General
- 9.2.2 Installation
- 9.2.3 Equipment
- 9.3 Operational qualification
- 9.4 Performance qualification
- 9.4.1 General
- 9.4.2 Performance qualification — Physical
- 9.4.3 Performance qualification — Microbiological
- 9.4.4 Performance qualification — Desorption and drying
- 9.4.4.1 Desorption
- 9.4.4.2 Drying
- 9.5 Review and approval of validation

10 Routine monitoring and control

- 10.1 General
- 10.2 Biological indicators

10.3 Chemical indicators
10.4 Records

11 Product release from sterilization

12 Maintaining process effectiveness

12.1 General
12.2 Maintenance of equipment
12.3 Requalification
12.4 Assessment of change

Annex A (normative) Process definition based on inactivation of reference microorganisms and knowledge of bioburden on product items to be sterilized

A.1 General
A.2 Procedure

Annex B (normative) Process definition based on inactivation of reference microorganisms

B.1 General
B.1.1 Overkill approach
B.1.2 Penetration characteristics into medical devices
B.2 Test procedure
B.2.1 General
B.2.2 Biological indicators
B.2.3 Test systems
B.2.4 Load configuration
B.2.5 Testing

Annex C (informative) Guidance on application of this document

C.1 Scope
C.2 Normative references
C.3 Terms and definitions
C.4 Quality management system elements
C.5 Sterilizing agent characterization
C.5.1 General
C.5.2 Sterilizing agent
C.5.3 Microbicidal effectiveness sterilizing agent
C.5.4 Material effects
C.5.5 Environmental considerations
C.6 Process and equipment characterization
C.7 Product definition
C.8 Process definition
C.9 Validation
C.9.1 General
C.9.2 Installation qualification (IQ)
C.9.3 Operational qualification (OQ)
C.9.4 Performance qualification (PQ)
C.9.4.1 General
C.9.4.2 Performance qualification — Physical
C.9.4.3 Performance qualification — Microbiological
C.9.4.4 Performance qualification — Desorption and drying
C.9.5 Documentation and approval of validation
C.10 Routine monitoring and control
C.10.1 General
C.10.2 Biological indicators
C.10.3 Chemical indicators
C.10.4 Records
C.11 Product release from sterilization
C.12 Maintaining process effectiveness
C.12.1 General
C.12.2 Maintenance of equipment
C.12.3 Requalification
C.12.4 Assessment of change

Annex D (informative) Environmental aspects regarding development, validation and routine control of low temperature steam and formaldehyde processes

D.1 General
D.2 Formaldehyde (brief description)
D.3 Environmental impact of formaldehyde
D.4 Other environmental burdens
