

ISO/TS 20399-1:2018-11 (E)

Biotechnology - Ancillary materials present during the production of cellular therapeutic products - Part 1: General requirements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	3
5	Considerations	3
5.1	General considerations	3
5.2	Animal-derived components of AM	3
5.2.1	General	3
5.2.2	Levels of ADCF	3
5.2.3	Key considerations in the use of animal-derived components	4
5.2.4	Viral inactivation	4
5.3	Mutual responsibilities for AMs	4
5.4	Example workflow	5
6	Ancillary material requirements	6
6.1	Quality management system	6
6.2	Information on ancillary material products and materials used to produce ancillary materials	6
Annex A (informative) Example of workflow from AM supplier to AM user		7
Annex B (informative) Information on AM products and materials used to produce AM		8
Bibliography		10
