

ISO 18250-7:2018-12 (E)

Medical devices - Connectors for reservoir delivery systems for healthcare applications - Part 7: Connectors for intravascular infusion

Contents	Page
Foreword	iv
Introduction	vi
1 *Scope	1
2 Normative references	1
3 Terms and definitions	2
4 General requirements	2
4.1 Non-interconnectability through conformance to this document	2
4.2 * Intravascular Reservoir Connector types	2
5 Material requirements	3
5.1 Connector Type 1: spikes and administration ports	3
5.2 Connector Type 2: Luers	3
6 Dimensional requirements	3
6.1 Connector Type 1: Spikes and Administration Ports	3
6.2 Connector Type 2: Luers	3
7 Performance requirements	3
7.1 * Connector Type 1: Spikes and Administration Ports	3
7.2 Connector Type 2: Luers	3
Annex A (informative) Rationale and guidance	4
Annex B (normative) Design of connectors*	13
Annex C (informative) Assessment of reservoir connectors and their attributes with connections to medical devices within this intravascular application	15
Annex D (informative) Summary of usability and requirements for connectors for intravascular reservoirs	16
Annex E (informative) Summary of reservoir connector design requirements for intravascular infusion	19
Annex F (informative) Summary of engineering analysis and residual misconnections for connectors for intravascular reservoirs	24
Annex G (informative) Alternative spikes	30
Bibliography	34
