

# ISO 18250-7:2018-12 (E)

## Medical devices - Connectors for reservoir delivery systems for healthcare applications - Part 7: Connectors for intravascular infusion

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		vi
1        *Scope .....		1
2        Normative references .....		1
3        Terms and definitions .....		2
4        General requirements .....		2
4.1      Non-interconnectability through conformance to this document .....		2
4.2      * Intravascular Reservoir Connector types .....		2
5        Material requirements .....		3
5.1      Connector Type 1: spikes and administration ports .....		3
5.2      Connector Type 2: Luers .....		3
6        Dimensional requirements .....		3
6.1      Connector Type 1: Spikes and Administration Ports .....		3
6.2      Connector Type 2: Luers .....		3
7        Performance requirements .....		3
7.1      * Connector Type 1: Spikes and Administration Ports .....		3
7.2      Connector Type 2: Luers .....		3
Annex A (informative) Rationale and guidance .....		4
Annex B (normative) Design of connectors* .....		13
Annex C (informative) Assessment of reservoir connectors and their attributes with connections to medical devices within this intravascular application .....		15
Annex D (informative) Summary of usability and requirements for connectors for intravascular reservoirs .....		16
Annex E (informative) Summary of reservoir connector design requirements for intravascular infusion .....		19
Annex F (informative) Summary of engineering analysis and residual misconnections for connectors for intravascular reservoirs .....		24
Annex G (informative) Alternative spikes .....		30
Bibliography .....		34
