

# ISO 18250-7:2018-12 (E)

## Medical devices - Connectors for reservoir delivery systems for healthcare applications - Part 7: Connectors for intravascular infusion

---

<b>Contents</b>	<b>Page</b>
Foreword .....	iv
Introduction .....	vi
1      *Scope .....	1
2      Normative references .....	1
3      Terms and definitions .....	2
4      General requirements .....	2
4.1    Non-interconnectability through conformance to this document .....	2
4.2    * Intravascular Reservoir Connector types .....	2
5      Material requirements .....	3
5.1    Connector Type 1: spikes and administration ports .....	3
5.2    Connector Type 2: Luers .....	3
6      Dimensional requirements .....	3
6.1    Connector Type 1: Spikes and Administration Ports .....	3
6.2    Connector Type 2: Luers .....	3
7      Performance requirements .....	3
7.1    * Connector Type 1: Spikes and Administration Ports .....	3
7.2    Connector Type 2: Luers .....	3
Annex A (informative) Rationale and guidance .....	4
Annex B (normative) Design of connectors* .....	13
Annex C (informative) Assessment of reservoir connectors and their attributes with connections to medical devices within this intravascular application .....	15
Annex D (informative) Summary of usability and requirements for connectors for intravascular reservoirs .....	16
Annex E (informative) Summary of reservoir connector design requirements for intravascular infusion .....	19
Annex F (informative) Summary of engineering analysis and residual misconnections for connectors for intravascular reservoirs .....	24
Annex G (informative) Alternative spikes .....	30
Bibliography .....	34
