ISO 11607-1:2019 (E)

Packaging for terminally sterilized medical devices — Part 1: Requirements for materials, sterile barrier systems and packaging systems

Contents

Foreword

Introduction

- 1 Scope
- 2 Normative references
- 3 Terms and definitions

4 General requirements

- 4.1 Quality systems
- 4.2 Risk management
- 4.3 Sampling
- 4.4 Test methods
- 4.5 Documentation
- 5 Materials, preformed sterile barrier systems and sterile barrier systems
 - 5.1 General requirements
 - 5.2 Microbial barrier properties
 - 5.3 Compatibility with the sterilization process
 - 5.4 Labelling system
 - 5.5 Storage and transport of materials and preformed sterile barrier systems
- 6 Design and development for packaging systems
 - 6.1 General
 - 6.2 Design
- 7 Usability evaluation for aseptic presentation
- 8 Packaging system performance and stability
 - 8.1 General
 - 8.2 Packaging system performance testing
 - 8.3 Stability testing
- 9 Packaging system validation and changes
- 10 Inspection immediately prior to aseptic presentation
- 11 Information to be provided
- Annex A (informative) Guidance on medical packaging
 - A.1 Factors influencing the choice of the materials and design of the packaging system
 - A.2 Sterilization processes and considerations
 - A.3 Sterile barrier systems
- Annex B (informative) Standardized test methods, guides and procedures that can be used to demonstrate conformity with the requirements of this document
 - B.1 General
 - B.2 Packaging materials and preformed sterile barrier systems
- Annex C (normative) Test method for resistance of impermeable materials to the passage of air

- Annex D (informative) Environmental aspects
- Annex E (informative) Draft guidance on ways to differentiate a sterile barrier system from protective packaging
