ISO 21370:2019 (E)

Traditional Chinese medicine — Dendrobium officinale stem

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Descriptions

5 Requirements

- 5.1 General characteristics
- 5.2 Dendrobium officinale stem
- 5.2.1 Morphological features
- 5.2.1.1 Fresh stem
- 5.2.1.2 Dried stem
- 5.2.1.3 Processed stem
- 5.2.2 Thin-layer chromatogram (TLC) identification
- 5.2.3 Moisture
- 5.2.4 Total ash
- 5.2.5 Ethanol-soluble extractives
- 5.2.6 Marker compounds
- 5.2.7 Heavy metals
- 5.2.8 Pesticide residues

6 Sampling

7 Test methods

- 7.1 Macroscopic identification
- 7.2 TLC identification
- 7.3 Determination of moisture content
- 7.4 Determination of total ash
- 7.5 Determination of ethanol-soluble extractives
- 7.6 Determination of marker compounds
- 7.7 Determination of heavy metals
- 7.8 Determination of pesticide residues

8 Test report

9 Packaging, storage and transportation

10 Marking and labelling

Annex A (informative) TLC identification

- A.1 Preparation of test solution
- A.2 Preparation of reference standard solution
- A.3 Developing solvent system
- A.4 Identification by TLC

Annex B (informative) Determination of ethanol-soluble extractives

Annex C (informative) Determination of polysaccharides

C.1 Principle of the test method
C.2 Preparation of test solution
C.3 Preparation of reference standard solution
C.4 Construction of calibration curve
C.5 Content of polysaccharides

Annex D (informative) Determination of mannose and peak area ratio of mannose to glucose

D.1 Principle of the test method
D.2 Preparation of internal standard solution
D.3 Preparation of reference standard solution
D.4 Preparation of test solution
D.5 Chromatographic condition
D.6 Calculation of calibration factor
D.7 Content of mannose
D.8 Peak area ratio of mannose to glucose
D.9 Typical HPLC chromatogram

Annex E (informative) Reference values of national and regional limits of moisture, total ash, ethanol-soluble extractives, polysaccharides, mannose and peak area ratio of mannose to glucose in Dendrobium officinale stem
