ISO 21317:2019 (E)

Traditional Chinese medicine — Lonicera japonica flower

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Descriptions

5 Requirements

- 5.1 General characteristics
- 5.2 Macroscopic characteristics
- 5.3 Microscopic characteristics
- 5.4 Moisture
- 5.5 Total ash
- 5.6 Acid-insoluble ash
- 5.7 Dilute ethanol-soluble extract
- 5.8 Identification of chlorogenic acid and luteoloside
- 5.9 Chlorogenic acid content
- 5.10 Luteoloside content
- 5.11 Heavy metals content

6 Sampling

7 Test methods

- 7.1 Macroscopic identification
- 7.2 Microscopic identification
- 7.3 Determination of moisture content
- 7.4 Determination of total ash content
- 7.5 Determination of acid-insoluble ash content
- 7.6 Determination of dilute ethanol-soluble extract content
- 7.7 Identification of chlorogenic acid and luteoloside
- 7.8 Determination of chlorogenic acid content
- 7.9 Determination of luteoloside content
- 7.10 Determination of heavy metals content

8 Test report

9 Packaging, storage and transportation

10 Marking and labelling

Annex A (informative) Identification of chlorogenic acid and luteoloside

- A.1 Preparation of test solution
- A.2 Preparation of reference solutions
- A.3 Preparation of chromogenic agent
- A.4 Identification

Annex B (informative) Determination of chlorogenic acid content

- B.1 Preparation of reference solution
- B.2 Preparation of test solution

B.3 Chromatographic system
B.4 Detection and content calculation of chlorogenic acid

Annex C (informative) Determination of luteoloside content

C.1 Preparation of reference solution
C.2 Preparation of test solution
C.3 Chromatographic system
C.4 Detection and content calculation

Annex D (informative) Reference values of national and regional limits of moisture, total ash, acid-insoluble ash, dilute ethanol-soluble extract, chlorogenic acid, luteoloside and heavy metals in Lonicera japonica flower
