

# DIN EN ISO 22367:2020-09 (E)

## Medical laboratories - Application of risk management to medical laboratories (ISO 22367:2020)

---

<b>Contents</b>		<b>Page</b>
<b>European foreword</b> .....		4
<b>Foreword</b> .....		5
<b>Introduction</b> .....		6
<b>1 Scope</b> .....		7
<b>2 Normative references</b> .....		7
<b>3 Terms and definitions</b> .....		7
<b>4 Risk management</b> .....		14
4.1 Risk management process .....		14
4.2 Management responsibilities .....		15
4.3 Qualification of personnel .....		16
4.4 Risk management plan .....		16
4.4.1 General .....		16
4.4.2 Scope of the plan .....		17
4.4.3 Contents of the plan .....		17
4.4.4 Revisions to the plan .....		17
4.4.5 Risk management documentation .....		18
<b>5 Risk analysis</b> .....		18
5.1 General .....		18
5.2 Risk analysis process and documentation .....		19
5.3 Intended medical laboratory use and reasonably foreseeable misuses .....		19
5.4 Identification of characteristics related to safety .....		19
5.5 Identification of hazards .....		19
5.6 Identification of potentially hazardous situations .....		20
5.7 Identification of foreseeable patient harms .....		20
5.8 Estimation of the risk(s) for each hazardous situation .....		20
<b>6 Risk evaluation</b> .....		21
6.1 Risk acceptability criteria .....		21
6.2 Risk evaluation process .....		22
<b>7 Risk control</b> .....		22
7.1 Risk control options .....		22
7.2 Risk control verification .....		23
7.3 Role of standards in risk control .....		23
7.4 Role of IVD medical devices in risk control .....		23
7.5 Risks arising from risk control measures .....		23
7.6 Residual risk evaluation .....		23
<b>8 Benefit-risk analysis</b> .....		24
<b>9 Risk management review</b> .....		24
9.1 Completeness of risk control .....		24
9.2 Evaluation of overall residual risk .....		24
9.3 Risk management report .....		25
<b>10 Risk monitoring, analysis and control activities</b> .....		25
10.1 Surveillance procedure .....		25
10.2 Internal sources of risk information .....		26
10.3 External sources of risk information .....		26
10.4 Immediate actions to reduce risk .....		26

<b>Annex A (informative) Implementation of risk management within the quality management system</b> .....	<b>27</b>
<b>Annex B (informative) Developing a risk management plan</b> .....	<b>37</b>
<b>Annex C (informative) Risk acceptability considerations</b> .....	<b>39</b>
<b>Annex D (informative) Identification of characteristics related to safety</b> .....	<b>42</b>
<b>Annex E (informative) Examples of hazards, foreseeable sequences of events and hazardous situations</b> .....	<b>49</b>
<b>Annex F (informative) Nonconformities potentially leading to significant risks</b> .....	<b>57</b>
<b>Annex G (informative) Risk analysis tools and techniques</b> .....	<b>65</b>
<b>Annex H (informative) Risk analysis of foreseeable user actions</b> .....	<b>70</b>
<b>Annex I (informative) Methods of risk assessment, including estimation of probability and severity of harm</b> .....	<b>74</b>
<b>Annex J (informative) Overall residual risk evaluation and risk management review</b> .....	<b>80</b>
<b>Annex K (informative) Conducting a benefit-risk analysis</b> .....	<b>82</b>
<b>Annex L (informative) Residual risk(s)</b> .....	<b>85</b>
<b>Bibliography</b> .....	<b>86</b>
