ISO 21899:2020 (E)

Biotechnology — Biobanking — General requirements for the validation and verification of processing methods for biological material in biobanks

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 General and resource requirements

6 Selection of processing methods

7 Processing method implementation

- 7.1 Targets for method implementation
- 7.2 Processing method implementation

8 Initial validation of a processing method

- 8.1 General
- 8.2 Validation plan
- 8.3 Assays for properties of interest
- 8.4 Validation execution
- 8.4.1 General
- 8.4.2 Validation site
- 8.4.3 In-house or outsourced testing
- 8.5 Targets for processing method validation
- 8.5.1 General
- 8.5.2 Fitness for purpose
- 8.5.3 Reproducibility
- 8.5.4 Robustness
- 8.5.5 Homogeneity
- 8.5.6 Stability
- 8.6 Review and approval of validation report

9 Further validation

10 Method verification

11 Ongoing monitoring of a processing method

- 11.1 General
- 11.2 Frequency of the monitoring
- 11.3 Planning
- 11.4 Procedure of the systematic monitoring
- 11.5 Procedure of the periodic monitoring
- 11.6 External quality assessments (EQA)/Interlaboratory exercises

12 Record keeping and archiving

Annex A (informative) Processing and testing methods

Annex B (informative) Examples of validation plans
