ISO 21973:2020 (E)

Biotechnology — General requirements for transportation of cells for therapeutic use

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General concepts

5 Cell transportation specification

5.1 General
5.2 Items specified in the cell transportation specification
5.2.1 General
5.2.2 Information reflected in the cell transportation specification
5.2.2.1 General
5.2.2.2 Classification information
5.2.2.3 Storage and handling conditions
5.2.2.4 Shipping information
5.2.3 Capability of the cell transportation service provider and its external service provider(s)
5.2.3.1 General
5.2.3.2 Temperature
5.2.3.3 Transportation schedule
5.2.3.4 Precautions/prohibitions
5.2.3.5 Specific procedures for cell transportation
5.2.3.5.1 General
5.2.3.5.2 Pickup procedure
5.2.3.5.3 Handling procedure
5.2.3.5.4 Delivery procedure
5.3 Risk management, verification and validation
5.3.1 Risk management
5.3.1.1 General
5.3.1.2 Risk assessment
5.3.1.3 Risk control
5.3.2 Verification and validation

6 Best practices for shipping container and labelling

6.1 General
6.2 Shipping container
6.2.1 Shipping container systems
6.2.2 Shipping container requirements
6.3 Labelling of the shipping container
6.3.1 Information to be labelled
6.3.1.1 General
6.3.1.2 Unique identifier
6.3.2 Physical requirements for the label
6.3.3 Handling of labels

7 Operation

7.1 General operation
7.1.1 General

7.1.2 Preparation of shipment
7.1.3 Transportation
7.1.4 Inspection at the time of delivery
7.2 Traceability
7.3 System to handle exceptional operations
7.3.1 Emergency handling
7.3.2 Management in case of an incident

8 Organization

8.1 General
8.2 Personnel training
8.2.1 General
8.2.2 Training plans
8.2.3 Training records
8.3 Quality management system (QMS) considerations

9 Storage facility

9.1 General
9.2 Storage facility considerations

10 Documented information
