

### Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	Configuration and classification
4.1	Configuration
4.2	Classification
5	Requirements and test methods
5.1	Wavelength
5.2	Spot size
5.3	Pulse repetition rate
5.4	Output power
5.5	Energy density
5.6	Output independency
5.7	Laser emission indicators
5.8	Power stability of continuous wave laser
5.9	Energy stability of pulsed laser
5.10	Target-indicating function
5.11	Probe fixing unit
5.12	Eye protection
6	Biological evaluation
7	Electrical safety
8	Electromagnet disturbances
9	Instructions for use (IFU)
