ISO/TS 23565:2021-10 (E)

Biotechnology - Bioprocessing - General requirements and considerations for equipment systems used in the manufacturing of cells for therapeutic use

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 General considerations 4
4.1 General 4
4.2 Incorporating equipment and testing into the manufacturing workflow of cells for therapeutic use 5
4.3 Unit operation equipment systems 6
4.4 Connecting to upstream or downstream processing equipment, or both 6
4.5 Monitoring and surveillance software 6
4.6 Impurity and toxicity contribution to final cells for therapeutic use 6
4.7 Sterility and non-pyrogenicity 6

5 Equipment overall performance characteristics and evaluation 7
5.1 General 7
5.2 Description of performance characteristics 7
5.3 Performance parameters and correlation to cell quality attributes 8

6 Components of the equipment system 8
6.1 Hardware 8
6.1.1 General 8
6.1.2 Physical integrity 8
6.1.3 Physical strength 9
6.1.4 Packaging 9
6.1.5 Recovery of cells 9
6.1.6 Validation of performance qualification 9
6.1.7 Physical evaluation of equipment and cell sample interaction 9
6.1.8 Damage to cells 9
6.1.9 Impact to clean room environment 10
6.1.10 Monitoring 10
6.2 Equipment software for manufacturing of cells for therapeutic use 10
6.3 Consumables 11
6.3.1 General 11
6.3.2 Biocompatibility 11
6.3.3 Toxicity of chemical sterilants 11
6.3.4 Toxicity of extracted and leached materials 12
6.3.5 Particulates 12
6.3.6 Stability of disposable single-use components 13

7 Documentationandnotificationofchanges 13
7.1 Documentation 13
7.1.1 General 13
7.1.2 Documentation for off-the-shelf equipment or instruments 13
7.1.3 Custom-designed supplier documentation package for equipment or instruments 14

8 Use and maintenance of equipment 14

8.1 Use of equipment 14
8.2 Maintenance of equipment 15

Bibliography 16
