Snap-on bottles for metering pumps - Part 3: Plastic

| Contents | | Page |
|---|--|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 Scope | | 1 |
| 2 Normative references | | 1 |
| 3 Terms and definitions | | 1 |
| 4 Symbols | | 3 |
| 5 Dimensions | | 4 |
| 5.1 General | | 4 |
| 5.2 Bottles without sealing ring | | 4 |
| 5.3 Bottles with sealing ring | | 5 |
| 6 Materials | | 7 |
| 7 Requirements | | 7 |
| 7.1 General requirements | | 7 |
| 7.2 Physical requirements | | 8 |
| 7.2.1 Vertical Force | | 8 |
| 7.2.2 Particulate contaminations | | 8 |
| 7.3 Chemical requirements | | 8 |
| 7.4 Sterilization | | 8 |
| 8 Marking of the bottle | | 8 |
| 9 Packaging options | | 8 |
| 9.1 General packaging requirements | | 8 |
| 9.2 Packaging for nonsterile plastic bottles | | 9 |
| 9.3 Ready to sterilize or sterile plastic bottles | | 9 |
| Annex A (informative) Snap-on considerations | | 10 |
| Annex B (informative) Tightness test | | 12 |
| Annex C (informative) Inner depth measuring | | 13 |
| Annex D (informative) Vertical force measurement technical method | | 14 |
| Annex E (informative) Example of a packaging configuration | | 17 |
| Bibliography | | 18 |
