ISO/TS 16840-14:2023-05 (E)

Wheelchair seating - Part 14: Concepts related to managing external forces to maintain tissue integrity

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Effects on human tissues from interaction with a support surface 4
4.1 General principles 4
4.2 Phenomenological description 4
4.2.1 General 4
4.2.2 Pressure and shear 5
4.2.3 Friction 6
4.2.4 Distribution of strains 6
4.3 Clinical implications of support surface cover selection 8
4.4 Measurement of pressure distribution and shear 9
4.4.1 Pressure mapping 9
4.4.2 Shear sensors 9
4.4.3 Pressure and shear modelling 9

Annex A (informative) Considerations around the use of shear sensors 10

Bibliography 12
