Wheelchair seating - Part 14: Concepts related to managing external forces to maintain tissue integrity

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Effects on human tissues from interaction with a support surface	4
4.1	General principles	4
4.2	Phenomenological description	4
4.2.1	General	4
4.2.2	Pressure and shear	5
4.2.3	Friction	6
4.2.4	Distribution of strains	6
4.3	Clinical implications of support surface cover selection	8
4.4	Measurement of pressure distribution and shear	9
4.4.1	Pressure mapping	9
4.4.2	Shear sensors	9
4.4.3	Pressure and shear modelling	9
Annex A (informative) Considerations around the use of shear sensors		10
Bibliography		12
