

ISO 24190:2023-05 (E)

Biotechnology - Analytical methods - Risk-based approach for method selection and validation for rapid microbial detection in bioprocesses

| Contents | | Page |
|--------------------|-------------------------------------------------------------|-------------|
| Foreword | | v |
| Introduction | | vi |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | General considerations | 7 |
| 5 | Risk management for microbiological contamination | 7 |
| 5.1 | Risk management in manufacturing process | 7 |
| 5.2 | Risk management in microbial testing | 8 |
| 6 | Selection of a fit-for-purpose assay | 9 |
| 6.1 | General | 9 |
| 6.2 | Assay selection | 10 |
| 6.3 | Kit or system selection | 10 |
| 6.4 | Considerations for various test types | 11 |
| 6.5 | User requirement specifications | 12 |
| 6.5.1 | General | 12 |
| 6.5.2 | Speed | 12 |
| 6.5.3 | Sample volume | 12 |
| 6.5.4 | In-process versus final release testing | 12 |
| 6.5.5 | Specificity | 12 |
| 6.5.6 | Sensitivity | 13 |
| 7 | Validation | 13 |
| 7.1 | General concepts | 13 |
| 7.2 | Selection of microorganisms for validation | 14 |
| 7.3 | Quality by design of method validation | 15 |
| 7.4 | Revalidation method | 15 |
| 7.5 | System validation | 16 |
| 7.6 | Use of reference material in validation | 16 |
| 7.7 | Acceptance criteria of targeted validation parameters | 16 |
| 7.8 | Precision | 17 |
| 7.9 | Detection limit | 17 |
| 7.10 | Accuracy | 17 |
| 7.11 | Robustness | 18 |
| 7.12 | Ruggedness | 18 |
| 8 | Use and application of rapid microbial tests | 18 |
| 8.1 | Number and type of samples | 18 |
| 8.2 | Testing environment | 18 |
| 8.3 | Sensitivity | 19 |
| 8.4 | Analytical specificity (microorganism detection) | 19 |
| 8.5 | Comparable test data | 19 |
| 9 | Investigation of positive sterility results | 20 |

| | | |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| 10 | Training | 20 |
| 11 | Documentation | 21 |
| 12 | Test report | 21 |
| | Annex A (informative) Exemplary framework for identifying microbial contamination | 22 |
| | Annex B (informative) Risk analysis with cellular therapeutic products related to input materials -- Donor selection | 23 |
| | Annex C (informative) Risk analysis with cellular therapeutic products related to input materials -- Cell transformation and expansion | 24 |
| | Annex D (informative) Risk analysis with cellular therapeutic products related to input materials -- Packaging storage and administration | 26 |
| | Annex E (informative) Risk-based classification for monitoring practices for cellular therapeutic product manufacturing | 27 |
| | Annex F (informative) Validation of rapid microbial test methods | 28 |
| | Annex G (informative) Microorganisms for validation of rapid microbial test methods | 30 |
| | Annex H (informative) Methods for rapid microbial testing | 34 |
| | Annex I (informative) Environmental control | 41 |
| | Bibliography | 42 |
